The End of the Concessionary Regime Brandon Wolfe-Hunn, 2011 This dissertation analyzes the historical process that culminated in the 1972 nationalization of the Iraq Petroleum Company IPC a consortium that included four of the world's largest and most powerful corporations I draw on IPC archives recently declassified U S Government documents and the Arab press to trace the impact of Iraq's 1958 Free Officers Revolution on IPC interests in Iraq I show that the Revolution set in motion a process of institutional development that resulted in the complete nationalization of the Iraqi oil industry at a relatively early date and I emphasize the agency of a particular group of Western trained Iraqi technical experts in producing this outcome Moreover I examine U S and IPC efforts to counter Iraq's radical movements and offer an original interpretation of the relationship between the American government and the international oil industry I show that the Iraqi challenge to the IPC undermined the stability of an implicit corporatist bargain between the U S State Department and the major American oil companies and that the breakdown of this relationship was part of a larger crisis of American hegemony in the early 1970s In so doing I reveal powerful underlying factors that continue to drive the historical encounter between the U S and the Middle East
