The Routledge International Handbook of Religious Education Derek Davis, Elena Mikhaïlovna Miroshnikova, 2013 How and what to teach about religion is controversial in every country The Routledge International

Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions. It discusses how three models in particular seem to dominate the landscape. Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion, often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a separation model, thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally, leaving it to religious institutions and the home setting to provide religious instruction. Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught. Inevitably, there are countries which do not fit any of these dominant models, and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss legal parameters in terms of subjective versus objective instruction in religion, constitutional, statutory, social and political contexts to religious approaches, distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning, regional assessments which provide a welcome overview and comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians, and others interested in how religion and education interface around the world.

Indian Secularism: Constitutional Vision and its Subversion Dr. Avaneesh maurya, 2024-10-29. This book gives the reader a brief introduction to some of the theories of secular thought that are popular in the West as well as in India. It also deals extensively into what the true meaning of secularism in India is. It innovatively embeds Indian cases and contexts in the Constitutional Perspective. It presents an understating of the manner in which India developed its peculiar variant of secularism. Chapter 1 traces the historical and conceptual exposition of secularism both in the western and Indian contexts. Chapter two narrated the political intensions of the constitution framers and constitutional provisions. In the following two chapters it deals with judicial pronouncements with regards to secularism and also discussed the threats to Indian Constitutional Secularism and its vision by its rebellions. This work is a modified version of the doctoral thesis submitted to the Pondicherry University.
