Yearbook of European Environmental Law ,2007 Implementing the Precautionary Principle

Nicolas de Sadeleer, 2012-05-04 From fisheries to persistent organic pollutants to climate change itself no other environmental principle in environmental law has produced as much controversy as the precautionary principle Unlike a preventive approach in which action is taken provided that the threats to the environment are tangible with a precautionary approach authorities are prepared to tackle risks for which there is no definitive proof that the damage will materialize The ramifications of this increasingly apparent approach are profound and cut across all areas of risk assessment and management environmental law policy and regulation in every major sector However to date little thought has been dedicated to the implementation of the precautionary principle in a wide array of environmental circumstances This authoritative handbook addresses the legal aspects of how the precautionary principle is implemented in different sectors and examines its successes failures strengths and weaknesses Sectors and subjects covered include chemicals GMOs marine pollution fisheries and nature conservation and the book draws on cases in the EU in the USA and Nordic countries where the use of precaution has been gathering momentum Ultimately the book provides an indispensable appraisal of the question increasingly important in the era of human induced climate change of whether the precautionary principle is relevant indeed essential to avert major environmental and health risks and how and when it can be used successfully Published with MARIE CURIE ACTIONS

The Habitats Directive in its EU Environmental Law Context Charles-Hubert Born, An Cliquet, Hendrik

Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation

E-Cycling: Linking Trade and Environmental Law in the EC and the U.S. Harri Kalimo, 2006-06-20 Dr Kalimo's legal and policy analysis explores the phenomenon recycling throughout the entire product life cycle from the extraction of raw materials to the production and marketing of goods to the use of those goods and to the management of the resulting wastes In this light he shows how trade law interacts and can function within the demands and needs of the evolving environmental legal paradigm Overall the work provides more than one hundred examples of just how and when modern environmental and free trade law converge in the practical context of recycling of electronics such as mobile phones and personal computers in the internal markets of the EC and the U S E Cycling is an ideal text for anyone navigating the myriad legal issues surrounding environmental protection and free trade With holistic horizontal guidelines and innovative use of charts and figures the book will contribute to the effectiveness and coherence of public policy making on the environmental law trade law and constitutional law levels Published under the Transnational Publishers imprint

Strategic Environmental Assessment in International and European Law Simon Marsden, 2012-05-16 Makes an important contribution to the literature on SEA by drawing on and integrating international and European jurisprudence and scholarship as well as the policy science literature on SEA and environmental assessment The result is a rich analysis that provides environmental assessment professionals with an overview of the legal context in which assessments are carried out while also providing lawyers with valuable insights into the operation of SEA in policy formulation both within and beyond the state Dr Neil Craik author of *The International Law of Environmental Impact Assessment* It

The Environmental Rights Revolution David R. Boyd, 2011-11-29 The right to a healthy environment is the subject of extensive philosophical debates that revolve around a key question Should rights to clean air water and soil be entrenched in law This pioneering book answers this by moving beyond theoretical debate to measure the practical effects of enshrining the right in constitutions David Boyd analyzes 193

constitutions and the laws and court decisions of more than 100 nations in Europe Latin America Asia and Africa He reveals that nations with constitutional protections have stronger environmental laws enhanced enforcement greater government accountability and better access to justice information and public participation in decision making than nations without such provisions As a result they demonstrate superior environmental performance and have smaller ecological footprints Boyd not only demonstrates that constitutionalizing environmental protection has the power to make sustainability a priority he tells inspiring stories about the difference the right to a healthy environment is making in people s lives Transparency in Global Environmental Governance Aarti Gupta,2014-07-11 Transparency is increasingly seen as part of the solution to a complex array of economic political and ethical problems in an interconnected world It is often assumed to result in more accountable and effective governance The transparency turn in global environmental governance in particular is evident in a wide range of international agreements voluntary disclosure initiatives and public private partnerships This is the first book to scrutinise this transparency turn critically and to investigate whether it is a broadly transformative force or plays a more limited instrumental role *Cultural Landscapes and Land Use* Martin Dieterich,Jan van der Straaten,2006-07-06 Cultural landscapes are created by people and used by people but still decidedly rich in biodiversity and in harmony with nature The landscapes of fairy tales without dragons Socio economic complexity on top of biological diversity is the challenge nature conservation faces in the context of cultural landscape This book is an attempt to approach this complexity and provide a theoretical background as well as guidelines and examples for hands on solutions It draws on inputs from scientists administrators independent consultants and politicians from Europe and the United States With a particular emphasis on agriculture it attempts to merge disciplines such as philosophy law planning economics and conservation biology toward a common goal nature conservation and the preservation of biological diversity in landscapes under the pressure of human usage **The Great Disruption** Zaki Ladi,2007-09-04 The dynamic that currently underlies global social change is the product of forces that are not of a single type or origin As a consequence that change is experienced as a process that uproots individuals but gives no guidance for the future that destroys but does not reconstruct that prescribes action but provides no reassurance The radical uncertainty it engenders is an understandable source of anxiety the rich countries are increasingly worried about competition from low wage economies while the wretched of the earth suspect their precarious existences will come under even greater pressure Within each nation the constantly growing gap between winners and losers exacerbates these fears The Great Disruption is at its height This book is an examination and interpretation of the enormous complex of social changes which for want of a better word we term globalization Environmental Law in Development N. Niessen,2006-01-01 an important addition to the small but growing published literature on the development of environmental law in developing countries It will be of interest to academics and those involved in law development in Indonesia and the other developing countries Jennifer Mohamed Katerere Journal of Environmental Law This book asks whether environmental

law and policy in developed countries can be successfully transferred to developing countries It questions whether developing countries are indeed ready and able to implement new ideas from the developed world such as the integration of environmental law and use of market oriented instruments The authors draw insights from the case of Indonesia where they have experience of drafting environmental legislation and which is itself in the early stages of development Through these insights they seek to understand why environmental law that has been well developed in theory can in practice be difficult to monitor and adequately enforce Indeed a further question central to the book is why developing environmental law does not necessarily result in an efficient environmental policy Taking a comparative perspective and using a multi faceted methodology that draws on constitutional and administrative law human rights law criminal and liability law and international law as well as law and economics the authors conclude with an outline of some of the lessons that can be learnt by other jurisdictions seeking to develop environmental law Lawyers environmental engineers and social scientists involved in environmental law and policy in developing countries will find much to interest them in this book as will those concerned with development studies or with a particular interest in the case of Indonesia Environmental Policy in the EU Camilla Adelle,2013 This text brings together work on EU environmental policy Incorporating a range of case studies it explores the links between levels of governance and the environment in a number of policy areas **Acceso a la Informacion,**
