ZUM '98: The Z Formal Specification Notation Jonathan P. Bowen, Andreas Fett, Michael G. Hinchey, 1998-09-16 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that

we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany

Article Emergence in Old English Lotte Sommerer, 2018-05-22 This book investigates nominal determination in Old English and the emergence of the definite and the indefinite article Analyzing Old English prose texts it discusses the nature of linguistic categorization and argues that a usage based cognitive constructionalist approach best explains when how and why the article category developed It is shown that the development of the OE demonstrative *se* that and the OE numeral *an* one should not be told as a story of two individual grammaticalizing morphemes but must be reconceptualized in constructional terms The emergence of the morphological category article follows from constructional changes in the linguistic networks of OE speakers and especially from grammatical constructionalization i.e. the emergence of a new schematic mostly procedural form meaning pairing which previously did not exist in the construction Next to other functional cognitive reasons the book especially highlights analogy and frequency effects as driving forces of linguistic change

Rebuilding Family Relations for Children and Youth Separated from Family Sarah Hean, Vanessa Heaslip, Jonathan Parker, Pravin Tembjerg, 2024-10-16 This edited volume explores a range of causes for separation of children and young people from family the impact of these causes and methods that both professionals and families may employ to build or rebuild these relations In particular contributions focus on six high priority crises through which children and young people become either permanently or temporarily separated from their families removal by child welfare services migration family breakdown placement into institutional care incarceration and or the death of a parent Authors emphasize the feelings of grief and loss experienced both by the child and their family whatever the separation

context and the eventual impact on the young person's mental health. They conclude that reunification with the family is not always possible or desirable and permanent alternative sources of care and/or attachment may be required. But if reunification is possible, it is a complex and a multidimensional pathway as children move from one care context to the next. Innovation, coproduction with the birth family and tackling stigma and discrimination associated with family separations is a high priority.
