Yoder,2024 Instrumentalization of the wartime past for political gain is the subject of this study of eleven World War II commemorations Using a comparative conceptually original approach Yoder identifies the actors who manipulate memory surrounding wartime anniversaries such as the bombing of Dresden and ceremonies to honor fallen soldiers and fascist collaborators The cases of memory contestation span three geographic regions Western Europe Eastern Europe and Russia recognizing that each developed distinctive interpretations of the war and different patterns of memory politics This empirically rich study reveals the grievances that motivate memory challengers and their strategies for shaping the commemoration discourses and rituals The memory challengers toolkit includes varieties of emotional manipulation subtle distortion revisionism and full scale denial The study finds that while there are differences in context and strategy across cases and regions there are also areas of convergence Moreover a memory challenge in one country can spill over into others with serious consequences for foreign relations While *World War II Memory and Contested Commemorations in Europe and Russia* deals with debates and narratives about events in the last century its focus is on power persuasion and identity in the present **No Simple Victory** Norman Davies,2008-08-26 One of the world s leading historians re examines World War II and its outcome A clear eyed reappraisal of World War II that offers new insight by reevaluating well established facts and pointing out lesser known ones *No Simple Victory* asks readers to reconsider what they know about the war and how that knowledge might be biased or incorrect Norman Davies poses simple questions that have unexpected answers Can you name the five biggest battles of the war What were the main political ideologies that were contending for supremacy The answers to these questions will surprise even those who feel that they are experts on the subject Davies has
