What Should We Do With Our Brain Perspectives In Continental Philosophy:

What Should We Do with Our Brain? Catherine Malabou, 2009-08-25 Recent neuroscience in replacing the old model of the brain as a single centralized source of control has emphasized plasticity the quality by which our brains develop and change throughout the course of our lives Our brains exist as historical products developing in interaction with themselves and with their surroundings Hence there is a thin line between the organization of the nervous system and the political and social organization that both conditions and is conditioned by human experience Looking carefully at contemporary neuroscience it is hard not to notice that the new way of talking about the brain mirrors the management discourse of the neo liberal capitalist world in which we now live with its talk of decentralization networks and flexibility Consciously or unconsciously science cannot but echo the world in which it takes place In the neo liberal world plasticity can be equated with flexibility a term that has become a buzzword in economics and management theory The plastic brain would thus represent just another style of power which although less centralized is still a means of control In this book Catherine Malabou develops a second more radical meaning for plasticity Not only does plasticity allow our brains to adapt to existing circumstances it opens a margin of freedom to intervene to change those very circumstances Such an understanding opens up a newly transformative aspect of the neurosciences In insisting on this proximity between the neurosciences and the social sciences Malabou applies to the brain Marx's well known phrase about history people make their own brains but they do not know it This book is a summons to such knowledge

The Routledge Handbook of Biopolitics Sergei Prozorov, Simona Rentea, 2016-08-05 The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault's genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e.g. the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to

more advanced audiences interested in the current state of the art in biopolitics studies

Human Enhancement

Technologies and Our Merger with Machines

Woodrow Barfield, Sayoko Blodgett-Ford, 2021-06-15

A cross disciplinary approach is offered to consider the challenge of emerging technologies designed to enhance human bodies and minds Perspectives from philosophy ethics law and policy are applied to a wide variety of enhancements including integration of technology within human bodies as well as genetic biological and pharmacological modifications Humans may be permanently or temporarily enhanced with artificial parts by manipulating or reprogramming human DNA and through other enhancement techniques and combinations thereof We are on the cusp of significantly modifying and perhaps improving the human ecosystem This evolution necessitates a continuing effort to re evaluate current laws and if appropriate to modify such laws or develop new laws that address enhancement technology A legal ethical and policy response to current and future human enhancements should strive to protect the rights of all involved and to recognize the responsibilities of humans to other conscious and living beings regardless of what they look like or what abilities they have or lack A potential ethical approach is outlined in which rights and responsibilities should be respected even if enhanced humans are perceived by non enhanced or less enhanced humans as no longer human at all

Profaning Paul Cavan W. Concannon, 2021-12-10 A critical reconsideration of the repeated use of the biblical letters of Paul The letters of Paul have been used to support and condone a host of evils over the span of more than two millennia racism slavery imperialism misogyny and anti-Semitism to name a few Despite or in some cases because of this history readers of Paul have felt compelled to reappropriate his letters to fit liberal or radical politics seeking to set right the evils done in Paul s name Starting with the language of excrement refuse and waste in Paul s letters Profaning Paul looks at how Paul s shit is recycled and reconfigured It asks why readers from liberal Christians to academic biblical scholars to political theorists and philosophers feel compelled to make Paul into a hero mining his words for wisdom Following the lead of feminist queer and minoritized scholarship Profaning Paul asks what would happen if we stopped recycling Paul s writings By profaning the status of his letters as sacred texts we might open up new avenues for imagining political figurations to meet our current and coming political economic and ecological challenges Assembling Early Christianity Cavan W.

Concannon, 2017-09-07 In this book Cavan W Concannon explores the growth and development of Christianity in the second century He focuses on Dionysios of Corinth an early Christian bishop who worked to build a network of churches along trade routes in the eastern Mediterranean Using archaeological evidence and analysing Dionysios fragmentary letter collection Concannon shows how various networks and collectives assembled together and how various Christianities emerged and coexisted as a result of tenuous and shifting networks Dionysios story also overlaps with key early Christian debates notably issues of celibacy marriage re admission of sinners Roman persecution and the economic and political interdependence of churches which are also explored in this study Concannon s volume thus offers new insights into a fluid emergent Christianity at a pivotal moment of its evolution

Post-Colonial Globalisation Yonit Manor-Percival, Janet Dine, 2023-09-22 With the globalist project immersed in conflicts and adversity Post Colonial Globalisation offers an insight into the actors who animate it and the power dynamics which run through it Using the law as the prism through which these are examined and

fusing historical with contemporary perspectives the book contributes to understanding the crisis in which we find ourselves as a moment of both existential danger and an opportunity This book is in two parts The first part charts capitalism's historical progression to globalism through the lens of the act of taking Taking has risen to institutional prominence as a core concept in the legal lexicon of foreign investment protection to denote deprivation of private property Post Colonial Globalisation advances a broader notion of taking as a tool of social criticism From enclosures to colonial settlement to an empire of unequal exchanges to contemporary land grabs private property now so vigorously protected against taking was itself born out of taking The second part focuses on the ecological dimension of neoliberal globalisation and its hallmarks of unlimited growth and excessive extraction It has negatively impacted the climate the earth and its human and non human inhabitants to the point of putting their continued existence at risk Central to this is the deification of property Our understanding of proprietary relations and the rights they confer must be revisited if our interface with the planet is to be reconfigured The emerging doctrine of rights of nature offers one route which may lead us in this direction The two parts complement each other One looks at taking by members of the human species from each other The other looks at taking by the human species from nature This book is aimed at anyone who wishes to gain insight into the current crisis including students academics NGOs and policymakers

Laws and Societies in Global Contexts Eve Darian-Smith, 2013-01-31 This text promotes a more global sociolegal perspective that engages with multiple laws and societies and diverse sociolegal systems based on very different historical and cultural traditions interacting on multiple local national and global levels The approach to global legal pluralism seeks to provide a framework for envisioning new global governance regimes that move beyond state based solutions to deal with trenchant transnational challenges *Finding Augusta* Heidi Rae Cooley, 2014-03-04 *Finding Augusta* breaks new ground revising how media studies interpret the relationship between our bodies and technology This is a challenging exploration of how for both good and ill the sudden ubiquity of mobile devices GPS systems haptic technologies and other forms of media alter individuals experience of their bodies and shape the social collective The author succeeds in problematizing the most salient fact of contemporary mobile media technologies namely that they have become like highways and plumbing an infrastructure that regulates habit Audacious in its originality *Finding Augusta* will be of great interest to art and media scholars alike
