This Thing Called Reason Benjamin K. Akih, 2025-05-06 This book offers a conceptual analysis of reason proposing a plausible theory to resolve persistent vagueness in the historical use of the concept The proposed theory leads to the view that reason is fundamentally subjective and dependent on non inferential matters of faith Despite the inherent subjectivity we can arrive at a consensus in reasoning exercises because we all participate in a universal minimum religion that grounds all reasoning True atheism is therefore impossible This analysis bears on debates about the relation between faith and reason as well as the relation between ethics based on reason and ethics based on sentiments The book further shows that this new and original view of religiously constrained reason ought to equally inform our thinking about applied ethics such as politics law and economics

Error and Inference Deborah G. Mayo, Aris Spanos, 2009-10-26 Although both philosophers and scientists are interested in how to obtain reliable knowledge in the face of error there is a gap between their perspectives that has been an obstacle to progress By means of a series of exchanges between the editors and leaders from the philosophy of science statistics and economics this volume offers a cumulative introduction connecting problems of traditional philosophy of science to problems of inference in statistical and empirical modelling practice Philosophers of science and scientific practitioners are challenged to reevaluate the assumptions of their own theories philosophical or methodological Practitioners may better appreciate the foundational issues around which their questions revolve and thereby become better applied philosophers Conversely new avenues emerge for finally solving recalcitrant philosophical problems of induction explanation and theory testing

The Murdochian Mind Silvia Caprioglio Panizza, Mark Hopwood, 2022-06-07 Iris Murdoch was a philosopher and novelist of extraordinary breadth and originality whose work defies simple categorisation Her philosophical writing engages with an astonishingly wide range of figures from Plato and Kant to Sartre and Heidegger and her work increasingly inspires debate in ethics aesthetics religion and literature The Murdochian

Mind is an outstanding reference source to the full span of Murdoch's philosophical work comprising 37 specially commissioned chapters written by an international team of leading scholars. Divided into five clear parts, the volume covers the following areas: A guide to Murdoch's key philosophical texts including *The Sovereignty of Good* and *Metaphysics* as a Guide to *Morals*; Core themes and concepts in Murdoch's philosophy such as love, moral vision and attention; Murdoch's engagement with the history of philosophy including Plato, Kant, Hegel, Simone Weil and Wittgenstein; Interdisciplinary connections with art, literature and religion including Judaism, Buddhism and Christianity; Murdoch and contemporary philosophical debates including feminism, virtue ethics and metaethics; The application of Murdoch's thought to applied ethics including animal ethics, psychiatric ethics and the environment. Although recent years have seen a blossoming of interest in Murdoch's philosophy, *The Murdochian Mind* is the first volume to do justice to the incredibly rich and wide-ranging nature of her work. As such, it will be of great interest to students of philosophy, especially ethics and aesthetics, as well as those in related disciplines such as literature, religion and gender studies.
