What's Wrong with NATO and How to Fix it Mark Webber, James Sperling, Martin A. Smith, 2021-03-16 NATO the most successful alliance in history is beset by unresolved tensions and divergent interests that are undermining its cohesion credibility and capability In this new book Mark Webber James Sperling and Martin Smith explore four key post Cold War developments that threaten NATO s survival an overextended geostrategic reach and an unwieldy security policy portfolio a failure to address capability short falls and meet defence spending benchmarks US weariness and European wariness that call NATO into question and intra alliance discord over Russia s place in the European security order and how to deal with Moscow s destabilization of Georgia and Ukraine The authors propose in response a range of policy options that could reinvigorate NATO but conclude with a note of caution Alliances come and go and most are cast into the dustbin of history If NATO is to avoid this fate it must not only address the major problems that trouble it but also get to grips with future challenges to alliance cohesion and credibility from Brexit to the emerging contest with China

Trusting Yourself Ryan, M.J., 2015-07-01 In an age of constant media messages and so called expert advice telling us to be richer thinner smarter and faster we re all dogged with worry and self doubt Bestselling author M J Ryan believes we ve become so dependent on experts to tell us how to live our lives that we listen to everyone except ourselves In *Trusting Yourself* Ryan identifies the answers to feeling swept away by life understanding that we already have what it takes to cope and learning how to tap into the wisdom inside us by cultivating the three qualities of self awareness self confidence and self reliance She teaches us how to set the critics aside and to trust ourselves instead First she reveals the inner attitudes that nurture self trust If you accept that we learn through trial and error if you believe that we each have unique strengths and that no one of us has to have them all if you realize that labels only get in the way then your

self trust will grow your worries will shrink and you ll find happiness and success with a lot less effort This is a life coach in a book that readers can turn to again and again when stress or worry takes over to find more peaceful saner lives every day

Detention of Terrorism Suspects Maureen Duffy,2018-02-08 Controversial erosions of individual liberties in the name of anti terrorism are ongoing in liberal democracies The focus of this book is on the manner in which strategic discourse has been used to create accepted political narratives It specifically links aspects of that discourse to problematic and evolving terrorism detention practices that happen outside of traditional criminal and wartime paradigms with examples including the detentions at Guantanamo Bay and security certificates in Canada This book suggests that biased political discourse has in some respects continued to fuel public misconceptions about terrorism which have then led to problematic legal enactments supported by those misconceptions It introduces this idea by presenting current examples such as some of the language used by US President Donald Trump regarding terrorism and it argues that such language has supported questionable legal responses to terrorism It then critiques political arguments that began after 9 11 many of which are still foundational as terrorism detention practices evolve The focus is on language emanating from the US and the book links this language to specific examples of changed detention practices from the US Canada and the UK Terrorism is undoubtedly a real threat but that does not mean that all perceptions of how to respond to terrorism are valid As international terrorism continues to grow and to change this book offers valuable insights into problems that have arisen from specific responses with the objective of avoiding those problems going forward

What's Wrong with Addiction? Helen Keane,2002 This is an impressive work carefully structured researched and written a refreshingly lucid account that is both intellectually stimulating and professionally helpful Janet McCalman Addicts are generally regarded with either pity or grave disapproval But is being addicted to something necessarily bad These attitudes are explicit both in contemporary medical literature and in popular self help texts We categorise addiction as unnatural diseased and self destructive We demonise pleasure and desire and view the addict as physically and morally damaged Helen Keane s thought provoking text examines these assumptions in a new light In asserting that the wrongness of addiction is not fixed or indeed obvious she presents a refreshing challenge to more conventional accounts of addiction She also investigates the notion that people can be addicted to eating love and sex just as they are to drugs and alcohol What s Wrong with Addiction shows that most of our ideas about addiction take certain ideals of health and normality for granted It exposes strains in our society s oppositions between health and disease between the natural and the artificial between order and disorder and between self and other

Psychological Science Under Scrutiny Scott O. Lilienfeld,Irwin D. Waldman,2017-01-03 Psychological Science Under Scrutiny explores a range of contemporary challenges to the assumptions and methodologies of psychology in order to

encourage debate and ground the discipline in solid science Discusses the pointed challenges posed by critics to the field of psychological research which have given pause to psychological researchers across a broad spectrum of sub fields Argues that those conducting psychological research need to fundamentally change the way they think about data and results in order to ensure that psychology has a firm basis in empirical science Places the recent challenges discussed into a broad historical and conceptual perspective and considers their implications for the future of psychological methodology and research Challenges discussed include confirmation bias the effects of grant pressure false positive findings overestimating the efficacy of medications and high correlations in functional brain imaging Chapters are authored by internationally recognized experts in their fields and are written with a minimum of specialized terminology to ensure accessibility to students and lay readers Rosenbaum Review ,1922 **It's Just Me !** Gwendolyn A. Guity,2011-10-31 It s Just Me Is an coming of age book series In this book you are introduced to Heaven and her inner circle this includes friends enemies and family In this book she uses her trusty old Friend to help her tell about the summer she realized that things were coming to another level in her life It s Just Me is a great book packed with personality and humor which will connect with ages from a tween and up **Weaponizing Civilian Protection** Thomas Gregory,2025-01-18 Weaponizing Civilian Protection exposes how coalition efforts to minimize and mitigate civilian casualties during the recent conflict in Afghanistan also worked to rationalize the harm inflicted upon Afghan civilians Drawing on declassified documents and interviews with coalition officials it traces how civilian protection was reimagined as a martial tactic rather than a humanitarian imperative with coalition officials reframing civilian casualties as strategic setbacks that could imperil the entire mission This book examines the restrictions that coalition officials imposed on combat operations to minimize unnecessary harm to civilians whilst showing how these restrictions served to constitute civilian casualties as necessary in certain situations rendering their lives losable and their deaths ungrievable At the same time it examines the post incident mitigation measures coalition officials used to prevent civilian casualties becoming strategic setbacks including the condolence payments that were offered when civilians were harmed Rather than seeking to make amends for the harm inflicted upon them it claims that these post incident mitigation measures are best characterized as a necropolitical device concerned with managing mortality more effectively Crucially Weaponizing Civilian Protection shows that co opting civilian protection into a martial logic that is more concerned with winning wars than protecting the civilian population works to devalue and dehumanize civilians leaving them more vulnerable to death and destruction in future conflicts
