Together Now? Mike Carter,2019-02-05 This important disturbing and frequently heartbreaking book should be read by every politician in Westminster Adrian Tempany Observer In a few weeks time it would be thirty five years to the day since those men and women had walked 340 miles to try to save their communities and their culture and thirty five years since I had turned down Pete s invitation to join them I called work and booked some time off Then I bought a one way train ticket to Liverpool In 1981 Mike Carter s dad Pete organised the People s March for Jobs which saw 300 people walk from Liverpool

to London to protest as the Thatcher government's policies devastated industrial Britain and sent unemployment skyrocketing Just before the 2016 EU referendum Mike set off to walk the same route in a quest to better understand his dad and his country As he walked Mike found many echoes of the early eighties a working class overlooked and ignored by Westminster politicians communities hollowed out but fiercely resistant anger and despair co existing with hope and determination for change And he also found that he and Pete shared more in common than he might have thought All Together Now maps the intricate overlapping path of one man's journey and that of an entire country It is a book about belonging about whether to stay or go and about the need to write new stories for our communities and ourselves

Taming the Fringe Craig McMahon, 2021-04-09 Taming the Fringe analyses the regulation and evolution of two credit products that were and remain vital to the working poor Policymakers have struggled with pawnbroking and moneylending because they raise broader issues pertaining to poverty capitalism and financial regulation The values of easily accessible credit and financial independence compete with society s desire to protect people from predatory loans Policymakers have pondered whether regulation can lower costs without reducing access for those most in need of small cash loans Can government policy protect borrowers while also providing sufficient profit for lenders The many attempts at doing so reveal the difficulty of safeguarding the needs of people who have experienced financial trouble before seeking a loan Taming the Fringe is the first extended study of the payday lending and pawnbroking markets in Britain and the only one to examine over 160 years of financial results and market data This work explains why small value lenders have generated such passionate debate even being described as the devil incarnate It adds to our knowledge of fringe banking and the evolving role of financial regulation to protect the working poor Since 1870 pawnbrokers and moneylenders have actively shaped regulation a viewpoint the existing literature does not address adequately This work contributes to the scholarly and policy dialogue on financial inclusion working class poverty and the development and legitimacy of fringe lending This book analyses the motivation content and outcome of critical regulatory episodes that have shaped fringe banking While historians have written volumes

about consumer credit few have analysed why elite policymakers have sought to protect the working poor from some credit markets This work demonstrates that across time conflicting views on poverty and liberal economic theory have to varying degrees influenced how the government has protected the working poor and will be of interest to financial and economic historians

Why Knowing What To Do Is Not Enough Anne-Greet Keizer, Will Tiemeijer, Mark Bovens, 2019-09-19 This open access book sets out to explain the reasons for the gap between knowing and doing in view of self reliance which is more and more often expected of citizens In today's society people are expected to take responsibility for their own lives and be self reliant This is no easy feat They must be on constant high alert in areas of life such as health work and personal finances and if things threaten to go awry take appropriate action without further ado What does this mean for public policy Policymakers tend to assume that the government only needs to provide people with clear information and that once properly informed they will automatically do the right thing However it is becoming increasingly obvious that things do not work like that Even though people know perfectly well what they ought to do they often behave differently Why is this This book sets out to explain the reasons for the gap between knowing and doing It focuses on the role of non cognitive capacities such as setting goals taking action persevering and coping with setbacks and shows how these capacities are undermined by adverse circumstances By taking the latest psychological insights fully into account this book presents a more realist perspective on self reliance and shows government officials how to design rules and institutions that allow for the natural limitations in people's capacity to act
