Murphy, 1998 Ecofeminist Literary Criticism is the first collection of its kind a diverse anthology that explores both how ecofeminism can enrich literary criticism and how literary criticism can contribute to ecofeminist theory and activism Ecofeminism is a practical movement for social change that discerns interconnections among all forms of oppression the exploitation of nature the oppression of women class exploitation racism colonialism Against binary divisions such as self other culture nature man woman humans animals and white non white ecofeminist theory asserts that human identity is shaped by more fluid relationships and by an acknowledgment of both connection and difference Once considered the province of philosophy and women s studies ecofeminism in recent years has been incorporated into a broader spectrum of academic discourse Ecofeminist Literary Criticism assembles some of the most insightful advocates of this perspective to illuminate ecofeminism as a valuable component of literary criticism Human Dimensions of Wildlife Management Daniel J. Biodiversity and Equity Max Lambert,Christopher Schell,2023-09-28 This advanced textbook moves beyond a basic scientific comprehension of urban ecosystems to understand the essential details of how scientists policy makers and practitioners develop solutions to effectively manage urban biodiversity Such efforts necessitate unravelling the complex components that bolster or constrain biodiversity including human wildlife interactions resource availability climate fluctuations novel species relationships and landscape heterogeneity However key to an understanding of these processes is also recognizing the tremendous social variation inherent within and across urban areas The diversity of urban human communities fundamentally shapes how society designs builds and manages urban landscapes This means that urban environmental management unavoidably must account for human social variation Unfortunately urban systems have a history and continued legacy of social inequality e g systemic racism and classism that govern how cities are both built and managed This novel text not only highlights these connections but also illustrates the interdisciplinary approaches needed for advancing a new justice centred approach to nature conservation Urban Biodiversity and Equity is suitable for graduate level students and professional researchers from both natural and social science disciplines studying the ecology conservation and management of urban environments and their biodiversity It will also be of relevance and use to a broader audience of urban ecologists urban planners and urban wildlife practitioners Connection to Nature, Deep Ecology, and Conservation Social Science Christian Diehm,2020-12-15 In Connection to Nature Deep Ecology and Conservation Social Science Human Nature Bonding and Protecting the Natural World Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of identification with nature Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science

which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it
