William Rowan Hamilton Portrait Of A Prodigy:

William Rowan Hamilton Seán O'Donnell,1983 William Rowan Hamilton Seán O'Donnell,1983 **A History of Vector Analysis** Michael J. Crowe,1994-01-01 Prize winning study traces the rise of the vector concept from the discovery of complex numbers through the systems of hypercomplex numbers to the final acceptance around 1910 of the modern system of vector analysis **Remarkable Mathematicians** Ioan James,2002 This 2003 book contains portrayals of sixty mathematicians which collectively convey how mathematics developed into its modern form *A New History of Ireland: Ireland under the Union, II, 1870-1921* Daibhi O. Croinin,William Edward Vaughan,2005 Wordsworth, Coleridge, and 'the language of the heavens' Thomas Owens,2019-05-30 Thomas Owens explores some of the exultant visions inspired by Wordsworth's and Coleridge's close scrutiny of the night sky the natural world and the domains of science He examines a set of scientific patterns drawn from natural geometric celestial and astronomical sources which Wordsworth and Coleridge used to express their ideas about poetry religion literary criticism and philosophy and establishes the central importance of analogy in their creative thinking Analogies prompted the poets' imaginings in geometry and cartography in nature representations of the moon and natural history studies of spider webs streams and dew in calculus and conical refraction and in the discovery of infra red and ultraviolet light Although this is primarily a study of the patterns which inspired their writing the findings overturn the prevalent critical consensus that Wordsworth and Coleridge did not have the access interest or capacity to understand the latest developments in nineteenth century astronomy and mathematics which they did in fact possess Wordsworth Coleridge and the language of the heavens reinstates many relationships which the poets had with scientists and their sources Most significantly the book illustrates that these sources are not simply another context or historical lens through which to engage with Wordsworth's and Coleridge's work but are instead a controlling device of the symbolic imagination Exploring the structures behind Wordsworth's and Coleridge's poems and metaphysics stakes out a return to the evidence of the Romantic imagination not for its own sake but in order to reveal that their analogical configuration of the world provided them with a scaffold for thinking an intellectual orrery which ordered artistic consciousness and which they never abandoned **A Mind For Ever Voyaging** W. K. Thomas,Warren U. Ober,1989 Wordsworth depicted Newton as Roubiliac may well have done in his statue of him as voyaging in ecstasy through God's sensorium In the Prelude passage from which the title *A Mind For Ever Voyaging* is derived and in various others portraying Newton and science Wordsworth seems to have written for two audiences the general public and a much smaller private audience while seeking to elevate the minds of both to God Like Pope before him Wordsworth achieved What oft was wrought but ne'er so well expressed *On the Role of Division, Jordan and Related Algebras in Particle Physics* Feza Gürsey,Chia-Hsiung Tze,1996 This monograph surveys the role of some associative and non associative algebras remarkable by their ubiquitous appearance in contemporary theoretical physics particularly in particle physics It concerns the interplay

between division algebras specifically quaternions and octonions between Jordan and related algebras on the one hand and unified theories of the basic interactions on the other Selected applications of these algebraic structures are discussed quaternion analyticity of Yang Mills instantons octonionic aspects of exceptional broken gauge supergravity theories division algebras in anyonic phenomena and in theories of extended objects in critical dimensions The topics presented deal primarily with original contributions by the authors

The Mind of the Mathematician Michael Fitzgerald, Ioan James, 2007-07-16 An intriguing look at the psychology and personality of mathematicians with profiles of twenty prominent figures in the field What makes mathematicians tick How do their minds process formulas and concepts that for most of the rest of the world's population remain mysterious and beyond comprehension Is there a connection between mathematical creativity and mental illness In *The Mind of the Mathematician* internationally famous mathematician Ioan James and accomplished psychiatrist Michael Fitzgerald look at the complex world of mathematics and the mind Together they explore the behavior and personality traits that tend to fit the profile of a mathematician They discuss mathematics and the arts savants gender and mathematical ability and the impact of autism personality disorders and mood disorders These topics together with a succinct analysis of some of the great mathematical personalities of the past three centuries combine to form an eclectic and fascinating blend of story and scientific inquiry The authors' careful treatments are an especially welcome addition to a genre riddled with apocryphal anecdotes and shoddy scholarship

Nature: A New History of Ireland Theodore William Moody, Francis X. Martin, Francis John Byrne, 1976 A New History of Ireland in nine volumes provides a comprehensive new synthesis of modern scholarship on every aspect of Irish history and prehistory from the earliest geological and archaeological evidence through the middle ages down to the present day Back cover

Unstoppable Brilliance Michael Fitzgerald, Antoinette Walker, 2015-03-01 How much of what exceptional people achieve can be put down to their own efforts and inner drive and how much to fate In this groundbreaking study the authors argue that the extraordinary achievements of key figures in Irish history were indeed unstoppable a product of their character and unique way of interacting with the world In a series of fascinating character studies Antoinette Walker and Michael Fitzgerald argue that many of those who were crucial to the development of Ireland's political scientific and artistic traditions the revolutionaries Robert Emmet Pdraig Pearse and aon de Valera the scientist Robert Boyle mathematician William Rowan Hamilton and ethnographer Daisy Bates and the poet W B Yeats and writers James Joyce and Samuel Beckett would if they were alive today be diagnosed with Asperger's syndrome The authors examine the character quirks that lead them to believe that all nine can be seen as Asperger geniuses They assert that this condition meant that all nine were virtually predestined to become exceptional figures in their chosen field and that moreover Asperger's syndrome can be seen as the key to genius in all ages and all cultures

A New History of Ireland, Volume VI W. E. Vaughan, 2010-04-01 A New History of Ireland is the largest scholarly project in modern Irish history In 9 volumes it provides a comprehensive new synthesis of modern scholarship on
