Havana Beyond the Ruins Anke

Birkenmaier, Esther Whitfield, 2011-08-10 Looks at portrayals of Havana in literature music and the visual arts in the post Soviet era as the city is reinvented as a destination for international tourists and business ventures **An Environmental History of Latin America** Shawn William Miller, 2007-08-27 A narration of the mutually mortal historical contest between humans and nature in Latin America Covering a period that begins with Amerindian civilizations and concludes in the region's present urban agglomerations the work offers an original synthesis of the current scholarship on Latin America's environmental history and argues that tropical nature played a central role in shaping the region's historical development Human attitudes populations and appetites from Aztec cannibalism to more contemporary forms of conspicuous consumption figure prominently in the story However characters such as hookworms whales hurricanes bananas dirt butterflies guano and fungi make more than cameo appearances Recent scholarship has overturned many of our egocentric assumptions about humanity's role in history Seeing Latin America's environmental past from the perspective of many centuries illustrates that human civilizations ancient and modern have been simultaneously more powerful and more vulnerable than previously thought **Hurricanes and Society in the British Greater Caribbean, 1624-1783** Matthew Mulcahy, 2008-08-11 Hurricanes created unique challenges for the colonists in the British Greater Caribbean during the seventeenth and eighteenth centuries These storms were entirely new to European settlers and quickly became the most feared part of their physical environment destroying staple crops and provisions leveling plantations and towns disrupting shipping and trade and resulting in major economic losses for planters and widespread privation for slaves In this study Matthew Mulcahy examines how colonists made sense of hurricanes how they recovered from them and the role of the storms in shaping the development of the region's colonial settlements **Hurricanes and Society in the British Greater Caribbean 1624-1783** provides a useful new perspective on several topics including colonial science the plantation economy slavery and public and private charity By integrating the West Indies into the larger story of British Atlantic colonization Mulcahy's work contributes to early American history Atlantic history environmental history and the growing field of disaster studies **Hurricanes and the Middle Atlantic States** Rick Schwartz, 2007 This reference traces the region's 400 year recorded hurricane history from Jamestown to the present drawing on accounts in newspaper articles books private journals and interviews Emphasizing the human side of a hurricane's aftermath rather than scientific aspects each hurricane account tells how individuals and communities reacted to the storms Storms are profiled in year by year entries from the 1600s to the current century The Great Hurricane of 1780 Wayne Neely, 2012-09 The Great Hurricane of 1780 also known as Hurricane San Calixto II is one of the most powerful and deadliest North Atlantic hurricanes on record Often regarded as a cataclysmic hurricane the storm's worst effects were experienced on October 10 1780 In The Great Hurricane of 1780 author Wayne Neely chronicles the chaos and destruction it brought to the Caribbean This storm was likely generated in the mid Atlantic not far from the equator it was first felt in Barbados where just about every tree and house on the island was blown down The storm passed

through the Lesser Antilles and a small portion of the Greater Antilles in the Caribbean between October 10 and October 16 of 1780 Because the storm hit several of the most populous islands in the Caribbean the death toll was very high The official death toll was approximately 22 000 people but some historians have put the death toll as high as 27 500 Specifics on the hurricane s track and strength are unclear since the official North Atlantic hurricane database only goes back as far as 1851 Even so it is a fact that this hurricane had a tremendous impact on economies in the Caribbean and parts of North America and perhaps also played a major role in the outcome of the American Revolution This thoroughly researched history considers the intense storm and its aftermath offering an exploration of an important historical weather event that has been neglected in previous study

The Great African Slave Revolt of 1825 Manuel Barcia Paz,2012-06-06 In June 1825 the Cuban countryside witnessed a large African led slave rebellion a revolt that began a cycle of slave uprisings lasting until the mid 1840s The Great African Slave Revolt of 1825 examines this movement and its participants for the first time highlighting the significance of African warriors in New World plantation society Unlike previous slave revolts led by alliances between free people of color and slaves blacks and mulattoes Africans and Creoles and rural and urban populations only African born men organized the uprising of 1825 From this year onwards Barcia argues slave uprisings in Cuba underwent a phase of Africanization that concluded only in the mid 1840s with the conspiracy of La Escalera a large movement organized by free colored men with ample participation of the slave population The Great African Slave Revolt of 1825 offers a detailed examination of the sociopolitical and economic background of the Matanzas rebellion both locally and colonially Based on extensive primary sources particularly court records the study provides a microhistorical analysis of the days that preceded this event the uprising itself and the days and months that followed Barcia gives the Great African Revolt of 1825 its rightful place in the history of slavery in Cuba the Caribbean and the Americas

Veracruz and the Caribbean in the Seventeenth Century Joseph M. H. Clark,2023-01-19 In the seventeenth century Veracruz was the busiest port in the wealthiest colony in the Americas People and goods from five continents converged in the city inserting it firmly into the early modern world s largest global networks Nevertheless Veracruz never attained the fame or status of other Atlantic ports Veracruz and the Caribbean in the Seventeenth Century is the first English language book length study of early modern Veracruz Weaving elements of environmental social and cultural history it examines both Veracruz s internal dynamics and its external relationships Chief among Veracruz s relationships were its close ties within the Caribbean Emphasizing relationships of small scale trade and migration between Veracruz and Caribbean cities like Havana Santo Domingo and Cartagena Veracruz and the Caribbean shows how the city s residents especially its large African and Afro

descended communities were able to form communities and define identities separate from those available in the Mexican mainland

Hurricanes Paul V. Kislow, 2008 A hurricane is a tropical storm with winds that have reached a constant speed of 74 miles per hour or more Hurricane winds blow in a large spiral around a relative calm centre known as the eye The eye is generally 20 to 30 miles wide and the storm may extend outward 400 miles As a hurricane approaches the skies will begin to darken and winds will grow in strength As a hurricane nears land it can bring torrential rains high winds and storm surges A single hurricane can last for more than 2 weeks over open waters and can run a path across the entire length of the eastern seaboard August and September are peak months during the hurricane season that lasts from 1 June to 30 November This book presents the facts and history of hurricanes

The Golden Leaf Charlotte Cosner, 2021-04-30 A Choice Reviews Editors Pick Through the rise and fall of empires ideologies and economies tobacco grown on the tiny island of Cuba has remained an enduring symbol of pleasure and extravagance Cultivated as one of the first reliable commodities for those inhabitants who remained after conquistadors moved on in search of a mythical wellspring of gold tobacco quickly became crucial to the support of the swelling Spanish Empire in the seventeenth and eighteenth centuries Eventually however tobacco became one of the final stabilizing forces in the empire and it ultimately proved more resilient than the best laid plans of kings and queens Tobacco and those whose livelihoods depended on it shrugged off the Empire's collapse and pressed on into the twentieth century as an economic force any state or political power must reckon with Cosner explores the history of this golden leaf through the personal narratives of farmers bureaucrats and laborers all struggling to build an independent and lucrative economic engine Through conquest rebellion colonial and imperial schemes and the eventual Communist revolution Cuban tobacco and cigars became a luxury item that commanded loyalty that defied mere borders or embargoes Ultimately The Golden Leaf is a story of two carefully cultivated products Cuban tobacco and its lofty reputation
