Tulipa tarda

Common Name:
Tarda tulip

This plant is a very showy, low-growing species tulip, native to the sub-alpine meadows of central Asia. It usually blooms in May in Calgary. The clumps of narrow, bright green leaves grow about 10-15 cm high, and are topped with flowering stems bearing clusters of three to six star-shaped, bright yellow flowers with white tips. It is hardy, drought tolerant, and truly perennial in Calgary.

Chionodoxa forbesii

Common Name:
Glory of the snow

The stalks are topped with loose racemes of up to 12 outward facing flowers. Each plant has two narrow, upright basal leaves, which die down soon after flowering and seeding, making them relatively unobtrusive.

This prairie-hardy bulb establishes itself well and spreads readily through offsets and self-seeding and does well in part shade and full sun.

Fritillaria meleagris

Common Name:
Checkered lily

Flowers of the checkered lily are typically 4 cm in size. They are single, pendant, and bell-shaped, but with square shoulders that give them a slightly boxy look. Flowers are held on surprisingly thin, delicate, grey-green stems reaching 30-45 cm, with narrow grass-like foliage spaced out along the stem.

Penstemon 'Dark Towers'

Common Name: Beardtongue

'Dark Towers' penstemon has a tidy, mounding habit with attractive dark purple-red oval basal leaves and lance-shaped upper leaves. The striking bicolor (pale and dark) pink, tubular flowers are borne in racemes on tall stems and are highly appealing to pollinators such as butterflies and hummingbirds. The blooming period is late spring through mid summer. When sited properly in average to dry soils in full sun, 'Dark Towers' penstemon is a low-maintenance, reliable, and beautiful perennial selection for Calgary gardens.

Chelone obliqua

Common Name: Pink turtlehead

Pink turtlehead typically blooms in late summer, so it will put on a show when many other perennials are finished for the season. As a bonus, the plant will bloom for three to six weeks, and the flowers, racemes borne on tall stems, are suitable for cutting. The blooms are also highly appealing to pollinators, including bees, butterflies, and hummingbirds. Showcase pink turtlehead most effectively by planting it in drifts, in mixed borders, or in beds.

This plant with its dense, upright habit, attractive glossy green, toothed, oval-to-lance-shaped foliage, and striking dark pink flowers make it a standout in the perennial garden.

Stachys monieri 'Hummelo'

Common Name: Alpine Betony

Although Alpine Betony is related to the familiar lamb's ear (*S. byzantina*), it doesn't have any of the unruly characteristics of its woolly cousin. Alpine betony has a tidy, non-spreading, mounding form, with medium green, long, narrow, and slightly velvety leaves.

Beautiful, nectar-rich, reddish-purple flowers are borne upright on sturdy stems and are bee and butterfly magnets. (They are also ideal for use as cut flowers!) The blooming period lasts several weeks, from early through midsummer. Alpine betony may be used as a focal point, or in mixed beds or borders. Plant it in drifts for a showstopping effect.
