Yves Klein With The Void Full Powers:

Yves Klein Yves Klein, Kerry Brougher, Philippe Vergne, Hirshhorn Museum and Sculpture Garden, 2010 Yves Klein with the Void Full Powers is published to accompany the first major retrospective of the artist's work in the United States in nearly 30 years. It includes examples from all of Klein's major series including his Anthropometries, Cosmogonies, Fire Paintings, planetary reliefs, and blue monochromes, as well as selections of his lesser-known gold and pink monochromes, body and sponge reliefs, air architecture, and immaterial works. Essays by curators Kerry Brougher and Philippe Vergne, Klein Scholar Klaus Ottmann, art historian Kaira Cabanas, and curatorial fellow Andria Hickey, as well as archival materials and translations of his published and unpublished writings, offer insights into Klein's artistic endeavors and process. Yves Klein Kerry Brougher, Philippe Vergne, 2010 *Yves Klein*, 2010 *Yves Klein* Yves Klein, 2010 **Secular Music and Sacred Theology** Tom Beaudoin, 2013 When the basic conceptions of the world held by whole generations in the West are formed by popular culture and in particular by the music that serves as its soundtrack, can theology remain unchanged? The authors of the essays in this important volume insist that the answer is no. These gifted theologians help readers make sense of what happens to religious experience in a world heavily influenced by popular media culture, a world in which songs, musicians, and celebrities influence our individual and collective imaginations about how we might live. Readers will consider the theological relationship between music and the creative process, investigate ways that music helps create communities of heightened moral consciousness, and explore the theological significance of songs. Contributors to this fascinating collection include David Dalt, Maeve Heaney, Daniel White, Hodge Michael, J. Iafrate, Jeffrey F. Keuss, Mary McDonough, Gina Messina Dysert, Christian Scharen, Myles Werntz. Tom Beaudoin is associate professor of theology at Fordham University, specializing in practical theology. His books include *Witness to Dispossession*, *The Vocation of a Postmodern Theologian*, *Consuming Faith*, *Integrating Who We Are with What We Buy*, and *Virtual Faith*. The Irreverent Spiritual Faith of Generation X. He has given nearly 200 papers, lectures, or presentations on religion and culture over the last thirteen years. He has been playing bass in rock bands since 1986 and directs the Rock and Theology Project for Liturgical Press, www.rockandtheology.com. *Lasting Impressions* Jesse Matz, 2017-01-31 Impressionism captured the world's imagination in the late nineteenth century and remains with us today. Portraying the dynamic effects of modernity, impressionist artists revolutionized the arts and the wider culture. Impressionism transformed the very pattern of reality, introducing new ways to look at and think about the world and our experience of it. Its legacy has been felt in many major contributions to popular and high culture, from cubism and early cinema to the works of Zadie Smith and W. G. Sebald, from advertisements for Pepsi to the observations of Oliver Sacks and Malcolm Gladwell. Yet impressionism's persistence has also been a problem, a matter of inauthenticity, superficiality, and complicity in what is merely impressionistic about culture today. Jesse Matz considers these two legacies, the positive and the negative, to explain impressionism's true contemporary significance. As *Lasting Impressions* moves through contemporary

literature painting and popular culture Matz explains how the perceptual role cultural effects and social implications of impressionism continue to generate meaning and foster new forms of creativity understanding and public engagement

Compositional Intelligence Daniel Koehler, 2025-09-12 With a foreword by Mario Carpo Given the extensive data sources represented by urban environments this book investigates the potential of architecting for cities using large scale models the technological underpinning of Generative AI Koehler examines Large Language Models LLMs in relation to architectural questions of typology those critical junctures where architecture engages with the city itself Typology becomes the interface between an AI model and its modeled audiences represented languages and scales of operation The investigation reveals how LLMs represent a fundamental shift from comprehending discrete elements to understanding entire languages introducing a stochastic perspective that transforms how we read and shape urban reality At the heart of this framework lies the concept of inductive types threshold interfaces that superpose multiple value regimes and actively reconfigure themselves in response to changing urban conditions By treating architecture as a form of representational materialism rather than a fixed language designers can engage with complex urban systems while maintaining critical agency This approach envisions architecture as an embedding of languages where buildings become processors of information that compute through their spatial arrangements The synthetic knowledge produced by LLMs enables access to plural values and stakeholder perspectives allowing architects to participate in broader material ecologies through computational superposition rather than traditional dialectical methods Providing a robust theoretical framework as well as practical insights into how architects can adapt their notational tools and design processes to embrace AI this will be an essential read for any practicing or researching architect or urban designer interested in the implications of AI on the built environment

The Rise Sarah Lewis, 2014-03-04 It is one of the enduring enigmas of the human experience many of our most iconic creative endeavors from Nobel Prize winning discoveries to entrepreneurial inventions and works in the arts are not achievements but conversions corrections after failed attempts The gift of failure is a riddle Like the number zero it will always be both a void and the start of infinite possibility The Rise a soulful celebration of the determination and courage of the human spirit makes the case that many of our greatest triumphs come from understanding the importance of this mystery This exquisite biography of an idea is about the improbable foundations of creative human endeavor The Rise begins with narratives about figures past and present who range from writers to entrepreneurs Frederick Douglass Samuel F B Morse and J K Rowling for example alongside choreographer Paul Taylor Nobel Prize winning physicists Andre Geim and Konstantin Novoselov Arctic explorer Ben Saunders and psychology professor Angela Duckworth The Rise explores the inestimable value of often ignored ideas the power of surrender for fortitude the criticality of play for innovation the propulsion of the near win on the road to mastery and the importance of grit and creative practice Publisher's description
