

## Chapter 8 Vocabulary Study Guide (Key)

| Terms                               | Definition                                                                                                                                                                                                                   |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Adenosine Triphosphate (ATP)</b> | Compound used by cells to store and release energy (226)                                                                                                                                                                     |
| <b>Heterotroph</b>                  | Organism that obtains food by consuming other living things; also called a consumer (228)                                                                                                                                    |
| <b>Autotroph</b>                    | Organism that is able to capture energy from sunlight or chemicals and use it to produce its own food from inorganic compounds; also called a producer (228)                                                                 |
| <b>Photosynthesis</b>               | Process used by plants and other autotrophs to capture light energy and use it to power chemical reactions that convert carbon dioxide and water into oxygen and energy-rich carbohydrates such as sugars and starches (232) |
| <b>Chloroplast</b>                  | Organelle found in cells of plants and some other organisms that captures the energy from sunlight and converts it into chemical energy (232)                                                                                |
| <b>Pigment</b>                      | Light-absorbing molecule used by plants to gather the sun's energy (230)                                                                                                                                                     |
| <b>Chlorophyll</b>                  | Principal pigment of plants and other photosynthetic organisms (230)                                                                                                                                                         |
| <b>Thylakoid</b>                    | Sac-like photosynthetic membranes found in chloroplasts (231)                                                                                                                                                                |
