VLSI Circuit Design Methodology Demystified Liming Xiu, 2007-10-23 This book was written to arm engineers qualified and knowledgeable in the area of VLSI circuits with the essential knowledge they need to get into this exciting field and to help those already in it achieve a higher level of proficiency Few people truly understand how a large chip is developed but an understanding of the whole process is necessary to appreciate the importance of each part of it and to understand the process from concept to silicon It will teach readers how to become better engineers through a practical approach of diagnosing and attacking real world problems The Turn of Moore's Law from Space to Time Liming Xiu, 2022-05-24 This book states that a space induced crisis is recognized as the cause of trouble that Moore's Law is currently facing The contemporary practice of this empirical law can be considered as happening within a space dominant paradigm An alternative of exploiting potential in the dimension of time is identified as an emerging paradigm in microelectronics The new practice is termed a time oriented paradigm It is justified as the turn of Moore's Law from space to time The resultant Time Moore strategy is envisioned as the next generation enabler for continuing Moore's Law's pursuit of ever higher information processing power and efficiency It also serves as the perpetuation of the spirit that Moore's law is nothing but a collective storied history of innovations In the first part of this book by following Thomas Kuhn's seminal work around the concepts of paradigm and scientific revolution the argument for the Time Moore strategy Time Moore to use time more and the paradigm shift from space to time is carried out heavily through philosophical persuasion rather than technical proof due to the difficult challenge of change of mindset The second part of the book provides solid technical materials for supporting this transition from the old paradigm to the new one In short the goal of this book is to reevaluate the contemporary practice of microelectronics identify the cause of the current crisis advocate a change of mindset to circumvent the crisis and ultimately point out a new route for advancing After achieving so many unprecedented accomplishments through several decades of relentless endeavor it's time for the big ship of Moore's Law i.e the art of microelectronic system design to make a turn

Cybernetics and Automation Control Theory Methods in Intelligent Algorithms Radek Silhavy, 2019-05-09 This book discusses novel intelligent system algorithms and methods in cybernetics presenting new approaches in the field of cybernetics and automation control theory It constitutes the proceedings of the Cybernetics and Automation Control Theory Methods in Intelligent Algorithms Section of the 8th Computer Science On line Conference 2019 CSOC 2019 held on line in April 2019 **Electronic Packaging Science and Technology** King-Ning Tu, Chih Chen, Hung-Ming Chen, 2021-12-29

Must have reference on electronic packaging technology The electronics industry is shifting towards system packaging technology due to the need for higher chip circuit density without increasing production costs Electronic packaging or circuit integration is seen as a necessary strategy to achieve a performance growth of electronic circuitry in next generation electronics With the implementation of novel materials with specific and tunable electrical and magnetic properties
