To Cook A Continent Destructive Extraction And The Climate Crisis In Africa:

To Cook a Continent Nnimmo Bassey, 2012 Arguing that the climate crisis confronting the world today is rooted mainly in the wealthy economies abuse of fossil fuels indigenous forests and global commercial agriculture this important book investigates how Africa has been exploited and how Africans should respond for the good of all As it examines the oil industry in Africa and probes the causes of global warming this record warns of its insidious impacts and explores false solutions Demonstrating that the issues around natural resource exploitation corporate profiteering and climate change must be considered together if the planet is to be saved the book suggests how Africa can overcome the crises of environment and global warming *Earth Grab* Diana Bronson, 2011-10-27 Exploiting the general public's growing concerns about the ecological and climate crisis some corporations are proposing quick fixes that threaten to wreak havoc on our planet This book exposes how a biomass economy based on using gene technologies to reprogram living organisms will devastate our ecosystems as well as the human populations of the southern hemisphere by accelerating the wave of land grabs already common in Africa Asia and Latin America Well researched and groundbreaking this analysis explores a number of interrelated topics vis vis the uses of bio and nano technologies **Africa's Shadow Rise** Doctor Padraig Carmody, Peter Kragelund, Ricardo Reboledo, 2020-09-17 For years economists have spoken of Africa rising and despite the global financial crisis Africa continues to host some of the fastest growing economies in the world Africa's Shadow Rise however argues that the continent's apparent economic rise is essentially a mirage driven by developments elsewhere most particularly the expansion in China's economy While many African countries have experienced high rates of growth much of this growth may prove to be unsustainable and has contributed to environmental destruction and worsening inequality across the continent Similarly new economic relationships have produced new forms of dependency as African nations increasingly find themselves tied to the fortunes of China and other emerging powers Drawing on in depth fieldwork in southern Africa Africa's Shadow Rise reveals how the shifting balance of global power is transforming Africa's economy and politics and what this means for the future of development efforts in the region **People's and Workers' Climate Justice Charter Futures for South Africa** Vishwas Satgar, Jane Cherry, Awande Buthelezi, 2023-06-14 The world's first Climate Justice Charter emerged out of campaigning by the South African Food Sovereignty Campaign and Cooperative and Policy Alternative Centre during the recent drought 2014-2021 in South Africa It was developed in dialogue with drought affected communities labour unions social justice and environmental justice organisations faith based communities youth and children climate scientists and climate justice activists Moreover it translated climate justice ideas part of global struggles for the past two decades for frontline struggles in the country This book focuses on South Africa but captures the dilemma of all Africa and the Global South It lays bare the climate injustice and polycrisis in the world the resilience of the peoples and the intergenerational crimes committed by perpetrators We are slipping beyond injury time at the precipice Read this book share the message and

join forces to chart the way to life and sanity Nnimmo Bassey **Grassroots Responses to Extractivism** Samuel Leguizamón Grant, Felix Mantz, Mariko Frame, 2025-01-23 This volume makes visible the many innovative resistances and solutions emanating from the Global South in response to the injustices of the current global ecological crises Rooted in contemporary ecological imperialism these crises are subjecting marginalized communities in the Global South to the worst socio ecological repercussions worldwide whilst mainstream environmental policies and solutions reproduce market based approaches premised on a hegemonic Western world view The book details a wide variety of case studies from across Asia Africa and the Americas such as deforestation activism in Cambodia and grassroots community organisation against large scale land transactions in Liberia among many others The contributors composed of a mix of academics and activists propose bottom up solutions to the current ecological and climate crises This work highlights how anti capitalist anti colonial and anti anthropocentric alternatives and movements are realistic holistic and appropriate in the face of global ecological crises

Nature and Literary Studies Peter Remien, Scott Slovic, 2022-08-04 Nature and Literary Studies supplies a broad and accessible overview of one of the most important and contested keywords in modern literary studies Drawing together the work of leading scholars of a variety of critical approaches historical periods and cultural traditions the book examines nature's philosophical theological and scientific origins in literature as well as how literary representations of this concept evolved in response to colonialism industrialization and new forms of scientific knowledge Surveying nature's diverse applications in twenty first century literary studies and critical theory the volume seeks to reconcile nature's ideological baggage with its fundamental role in fostering appreciation of nonhuman being and agency Including chapters on wilderness pastoral gender studies critical race theory and digital literature the book is a key resource for students and professors seeking to understand nature's role in the environmental humanities **Destroying Democracy** Jane Duncan, Linda Gordon, Gunnett Kaaf, Dale T McKinley, Alf Gunvald Nilsen, Devan Pillay, Mandla J Radebe, Alfredo Saad-Filho, Ingar Solty, 2021-08-01 A history of the erosion of democracy across the globe Democracy is being destroyed This is a crisis that expresses itself in the rising authoritarianism visible in divisive and exclusionary politics populist political parties and movements increased distrust in fact based information and news and the withering accountability of state institutions Over the last four decades democracy has radically shifted to a market democracy in which all aspects of human non human and planetary life are commodified with corporations becoming more powerful than states and their citizens This is how neoliberal capitalism functions at a systemic level and if left unchecked is the greatest threat to democracy and a sustainable planet Volume six of the Democratic Marxism series focuses on how decades of neoliberal capitalism have eroded the global democratic project and how in the process authoritarian politics are gaining ground Scholars and activists from the political left focus on four country cases India Brazil South Africa and the United States of America in which the COVID 19 pandemic has fuelled and highlighted the pre existing crisis They interrogate issues of politics ecology state security media access to

information and political parties and affirm the need to reclaim and re build an expansive and inclusive democracy
Destroying Democracy is an invaluable resource for the general public activists scholars and students who are interested in understanding the threats to democracy and the rising tide of authoritarianism in the global south and the global north

Extracting Profit Lee Wengraf,2018-02-19 Extracting profit explains why Africa in the first decade and a half of the twenty first century has undergone an economic boom This period of Africa rising did not lead to the creation of jobs but has instead fueled the growth of the extraction of natural resources and an increasingly wealthy African ruling class **The African Book Publishing Record** ,2012 **Climate Change Is Racist** Jeremy Williams,2021-06-03 LONGLISTED FOR THE JAMES CROPPER WAINWRIGHT PRIZE LONGLIST 2022 Really packs a punch Aja Barber author of Consumed The Need for Collective Change Colonialism Climate Change and Consumerism Will open the minds of even the most ardent denier of climate change and or systemic racism If there s one book that will help you to be an effective activist for climate justice it s this one Dr Shola Mos Shogbamimu author of This is Why I Resist Accessible Poignant Challenging Nnimmo Bassey environmentalist and author of To Cook a Continent Destructive Extraction and the Climate Crisis in Africa When we talk about racism we often mean personal prejudice or institutional biases Climate change doesn t work that way It is structurally racist disproportionately caused by majority White people in majority White countries with the damage unleashed overwhelmingly on people of colour The climate crisis reflects and reinforces racial injustices In this eye opening book writer and environmental activist Jeremy Williams takes us on a short urgent journey across the globe from Kenya to India the USA to Australia to understand how White privilege and climate change overlap We ll look at the environmental facts hear the experiences of the people most affected on our planet and learn from the activists leading the change It s time for each of us to find our place in the global struggle for justice Sea Change Christina Gerhardt,2023-05-23 Low lying island nations are least responsible for global warming but they are already suffering its impacts severely and disproportionately According to the International Panel on Climate Change island nations are responsible for 0.03% of global emissions A weave of essays maps poems and illustrations Sea Change presents the impacts of and solutions to sea level rise An essay drawing on interviews scientific reports academic scholarship and archival research shares their histories present day challenges and efforts toward livable futures A map shows the inundation zones Poems breathe life into the analysis

Climate Change in Africa Camilla Toulmin,2009-10-15 Climate change is a major challenge for us all but for African countries it represents a particular threat This book outlines current thinking and evidence and the impact such change will have on Africa s development prospects Global warming above the level of two degrees Celsius would be enormously damaging for poorer parts of the world leading to crises with crops livestock water supplies and coastal areas Within Africa it s likely to be the continent s poorest people who are hit hardest In this accessible and authoritative introduction to an often overlooked aspect of the environment Camilla Toulmin uses case studies to look at issues ranging from natural disasters to

biofuels and from conflict to the oil industry Finally the book addresses what future there might be for Africa in a carbon constrained world **Climate Change in Africa** Camilla Toulmin,2008 *Climate Change in Africa* Camilla Toulmin,2009 Climate change is a major challenge for us all but for African countries it represents a particular threat This book outlines current thinking and evidence and the impact such change will have on Africa s development prospects Global warming above the level of two degrees Celsius would be enormously damaging for poorer parts of the world leading to crises with crops livestock water supplies and coastal areas Within Africa it s likely to be the continent s poorest people who are hit hardest In this accessible and authoritative introduction to an often overlooked aspect of the environment Camilla Toulmin uses case studies to look at issues ranging from natural disasters to biofuels and from conflict to the oil industry Finally the book addresses what future there might be for Africa in a carbon constrained world **A Bigger Picture** Vanessa Nakate,2021 First published 2021 by One Boat an imprint of Pan Macmillan Copyright page **Environmental Humanities of Extraction in Africa** James Ogude,Tafadzwa Mushonga,2022-08-17 This book brings together perspectives on resource exploitation to expose the continued environmental and socio political concerns in post colonial Africa The continent is host to a myriad of environmental issues largely resulting from its rich diversity of natural resources that have been historically subjected to exploitation Colonial patterns of resource use and capital accumulation continue unabated making environmental and related socio political problems a dominant feature of African economies The book pursues the manifestation of these problems through four themes environmental justice violent capitalocenes indigenous knowledge and climate change The editors locate the book within the broad fields of political ecology and environmental geopolitics to highlight the intricate geographies of resource exploitation across Africa It uniquely focuses on the socio political and geopolitical dynamics associated with the exploitation of Africa s natural resources and its people The case studies from different parts of Africa tell a compelling story of resource exploitation related issues of environmental degradation in a continent particularly vulnerable to climate change and the continued plundering of its natural resources The book will be of great interest to scholars and students from the interdisciplinary fields of the environmental humanities and environmental studies more broadly as well as those studying political ecology environmental policy and natural resources with a specific focus on Africa **The Climate Crisis** Vishwas Satgar,2018-02-01 Essays that address the question how can people and class agency change this destructive course of history Capitalism s addiction to fossil fuels is heating our planet at a pace and scale never before experienced Extreme weather patterns rising sea levels and accelerating feedback loops are a commonplace feature of our lives The number of environmental refugees is increasing and several island states and low lying countries are becoming vulnerable Corporate induced climate change has set us on an ecocidal path of species extinction Governments and their international platforms such as the Paris Climate Agreement deliver too little too late Most states including South Africa continue on their carbon intensive energy paths with devastating results Political leaders across the

world are failing to provide systemic solutions to the climate crisis This is the context in which we must ask ourselves how can people and class agency change this destructive course of history Volume three in the Democratic Marxism series The Climate Crisis investigates eco socialist alternatives that are emerging It presents the thinking of leading climate justice activists campaigners and social movements advancing systemic alternatives and developing bottom up just transitions to sustain life Through a combination of theoretical and empirical work the authors collectively examine the challenges and opportunities inherent in the current moment This volume builds on the class struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism Most importantly it explores ways to renew historical socialism with democratic eco socialist alternatives to meet current challenges in South Africa and the world **Healing Climate Crisis**

in East Africa Through Storytelling Twalha Twaha Abbass,2023 Contemporary research and reports from the climate agencies such as the World Meteorological Organization WMO and the Intergovernmental Panel on Climate Change IPCC show that the rapid industrialization in Western countries engineers the climate crisis Also although it contributes to only 3 8% of global greenhouse gas emission Africa is the most vulnerable continent However 19th century colonialism through various projects such as story collection and the introduction of commerce based land policies in Africa blurred the visibility of the African continent on the environmental discussions which has laid a foundation for the current state of the climate crisis through story collection Before colonialism African people had a close connection to nature through religious rituals performances and socio economic activities and this connection can be reflected in African folk stories Therefore it could be possible to heal the climate crisis by amplifying African stories and using them as a framework for curing it This study uses colonial and postcolonial folk story collections to examine how stories can re member African societies with nature making stories an essential tool for climate justice **Africa** John Magrath,2006 And recommendations Drought climatic variability and climate change in Africa El Ni o impacts Promoting sustainable agriculture Climate change and HIV AIDS the insidious links Farming food or biofuel

Climate Chaos and its Origins in Slavery and Capitalism Reva Blau,Judith Blau,2020-10-26 Climate Chaos provides readers the latest consensus among international scientists on the cascading impacts of climate change and the tipping points that today threaten to irreversibly destroy the delicate balance of the Earth s ecosystems The book argues that deregulation and an expansion of fossil fuel extraction have already tipped the planet towards a climate that is out of control This crisis will cause massive human suffering when extreme weather pollution and disease lead to displacement food and water shortages war and possibly species extinction The repression of science creates an existential crisis for humanity that has reached crisis proportions in the twentieth first century The scale of the crisis has prompted a call for geoengineering large interventions into the climate by technological innovation However the history of colonialism and slavery make the technological and monetary elites untrustworthy to solve this humanitarian and planetary crisis While the elites have always cast certain groups of humanity as expendable the climate crisis makes a true humanist

and egalitarian movement based in human rights and dignity not only aspirational but also existentially mandatory The crisis demands that we remake the world into a more just and safe place for all the world's people
