To Lead The World American Strategy After The Bush Doctrine:

To Lead the World Melvyn P. Leffler, Jeffrey W. Legro, 2008-07-21 In *To Lead the World* Melvyn P. Leffler and Jeffrey W. Legro bring together some of America's most esteemed writers and thinkers to offer concrete historically grounded suggestions for how America can regain its standing in the world and use its power more wisely than it has during the Bush years. They address such issues as how the US can regain its respect in the world, respond to the biggest threats now facing the country, identify reasonable foreign policy goals, manage a growing debt burden, achieve greater national security, and successfully engage a host of other problems left unsolved and in many cases exacerbated by the Bush Doctrine. Representing a wide range of perspectives, the writers gathered here place our current affairs firmly in the larger context of American and world history and draw upon realistic appraisals of both the strengths and the limits of American power. They argue persuasively that the kind of leadership that made the United States a great and greatly admired nation in the past can be revitalized to meet the challenges of the 21st century.

The Doctrines of US Security Policy Heiko Meiertöns, 2010-06-10 The practise of outlining principles for the conduct of US security policy in so-called doctrines is a characteristic feature of US foreign policy. From an international lawyer's point of view, two aspects of these doctrines are of particular interest. First, to what degree are the criteria for the use of force as laid down in these doctrines consistent with the limitations for the use of force in international law? Second, which law-creating effects do these doctrines have? Furthermore, the legal nature of these doctrines remains uncertain. These matters are examined beginning with the Monroe Doctrine of 1823 and taking into account the Stimson Doctrine of 1932, the doctrines of the Cold War period, and the Bush Doctrine of 2002. The Bush Doctrine, in particular, has generated controversies concerning its compatibility with Article 51 of the UN Charter due to its principle of preventive self-defence.

Joint Force Quarterly, 2009 **American Military Intervention in Unconventional War** W. Bert, 2016-04-30 A study of the major US military interventions in unconventional war, this book looks at four wars that occurred while the US was a superpower in the post-war WW II period and one in the Philippines in 1898.

New World Order and Small Regions Emil Avdaliani, 2022-08-29 The book provides a comprehensive understanding of the unfolding geopolitical changes in the South Caucasus in the age of increased great power competition across Eurasia. Recent research on the geopolitics of the South Caucasus focuses either on interstate relations among Armenia, Azerbaijan, and Georgia, or on each of the regional actors: Russia, Turkey, and Iran, ties with the region's one or all three states. Little attempt has been made to see the region's shifting geopolitical importance from a global perspective, growing US-China rivalry, and shifting balance of power in Eurasia. Recalibration of the US military and diplomatic vision in western Eurasia to adjust to the Chinese challenge. The book argues from a theoretical point of view that the increased competition in the region fits into the global pattern of unfolding great power competition when military and economic calculations drive regional powers to increase their influence on immediate neighborhoods, sidelining the collective West from the negotiating table and the emerging new security

architecture Sharing Power: Prospects for a U.S. Concert-Balance Strategy (Enlarged Edition) Patrick Porter, Strategic Studies Institute, U.S. Army War College, 2013-05-18 The subject of U S grand strategy has been getting increasing attention from the policy and academic communities But too often the debate suffers from being too reductionist limiting America s choices to worldwide hegemony or narrow isolation There is a wide spectrum of choices before Washington that lie somewhere in the middle Too often not enough thought is given to how such alternative strategies should be designed and implemented The future cannot be known and earlier predictions of American decline have proven to be premature However there is a shift in wealth and power to the extent that America may not be able to hold on to its position as an unrivalled unipolar superpower Therefore it is worth thinking about how the United States could shape and adjust to the changing landscape around it What is more there are a number of interlocking factors that mean such a shift would make sense transnational problems needing collaborative efforts *Rhetoric of InSecurity* Victoria Baines, 2021-07-13 This book demands that we question what we are told about security using tools we have had for thousands of years The work considers the history of security rhetoric in a number of distinct but related contexts including the United States security strategy the war on Big Tech and current concerns such as cybersecurity Focusing on the language of security discourse it draws common threads from the ancient world to the present day and the near future The book grounds recent comparisons of Donald Trump to the Emperor Nero in a linguistic evidence base It examines the potential impact on society of policy makers emphasis on the novelty of cybercrime their likening of the internet to the Wild West and their claims that criminals have gone dark It questions governments descriptions of technology companies in words normally reserved for terrorists and asks who might benefit Interdisciplinary in approach the book builds on existing literature in the Humanities and Social Sciences most notably studies on rhetoric in Greco Roman texts and on the articulation of security concerns in law international relations and public policy contexts It adds value to this body of research by offering new points of comparison and a fresh but tried and tested way of looking at problems that are often presented as unprecedented It will be essential to legal and policy practitioners students of Law Politics Media and Classics and all those interested in employing critical thinking **Developments in American Politics 6** Gillian Peele, 2010-06-15 Assessing the state of American politics in the Obama administration this text looks both at the institutional framework of government and at the policy dilemmas facing the United States today **Ready to Lead?** Robin Niblett, 2009 This report by Director of Chatham House Dr Robin Niblett draws on Chatham House s international expertise and contacts to offer an in depth analysis of President Obama administration s ambitions to renew US leadership in the world The report explores how the Obama administration can promote US global leadership at a time when many of the pillars of its international role have been weakened Looking at how the US will need to craft new ways of using its unique power and capacity to influence others the report s key conclusions are as follows America needs to change how it uses its power by sharing leadership where partners have as much or more to

offer America needs to focus less on its opponents and more on supporting its friends and allies in Europe Latin America the Middle East and Asia America needs to place less emphasis on individual leaders and parties and more on governance and political processes
