Veto Players George Tsebelis, 2002-09-15 Publisher Description **Veto Players** George Tsebelis, 2011-06-16 Political scientists have long classified systems of government as parliamentary or presidential two party or multiparty and so on But such distinctions often fail to provide useful insights For example how are we to compare the United States a presidential bicameral regime with two weak parties to Denmark a parliamentary unicameral regime with many strong parties **Veto Players** advances an important new understanding of how governments are structured The real distinctions between political systems contends George Tsebelis are to be found in the extent to which they afford political actors veto power over policy choices Drawing richly on game theory he develops a scheme by which governments can thus be classified He shows why an increase in the number of veto players or an increase in their ideological distance from each other increases policy stability impeding significant departures from the status quo Policy stability affects a series of other key characteristics of polities argues the author For example it leads to high judicial and bureaucratic independence as well as high government instability in parliamentary systems The propositions derived from the theoretical framework Tsebelis develops in the first part of the book are tested in the second part with various data sets from advanced industrialized countries as well as analysis of legislation in the European Union Representing the first consistent and consequential theory of comparative politics **Veto Players** will be welcomed by students and scholars as a defining text of the discipline From the preface to the Italian edition Tsebelis has produced what is today the most original theory for the understanding of the dynamics of contemporary regimes This book promises to remain a lasting contribution to political analysis Gianfranco Pasquino Professor of Political Science University of Bologna **Worse Than a Monolith** Thomas J. Christensen, 2011-03-14 In brute force struggles for survival such as the two World Wars disorganization and divisions within an enemy alliance are to one's own advantage However most international security politics involve coercive diplomacy and negotiations short of all out war **Worse Than a Monolith** demonstrates that when states are engaged in coercive diplomacy combining threats and assurances to influence the behavior of real or potential adversaries divisions rivalries and lack of coordination within the opposing camp often make it more difficult to prevent the onset of conflict to prevent existing conflicts from escalating and to negotiate the end to those conflicts promptly Focusing on relations between the Communist and anti Communist alliances in Asia during the Cold War Thomas Christensen explores how internal divisions and lack of cohesion in the two alliances complicated and undercut coercive diplomacy by sending confusing signals about strength resolve and intent In the case of the Communist camp internal mistrust and rivalries catalyzed the movement's aggressiveness in ways that we would not have expected from a more cohesive movement under Moscow's clear control Reviewing newly available archival material Christensen examines the instability in relations across the Asian Cold War divide and sheds new light on the Korean and Vietnam wars While recognizing clear differences between the Cold War and post Cold War environments he investigates how efforts to adjust

burden sharing roles among the United States and its Asian security partners have complicated U S China security relations since the collapse of the Soviet Union

Institutional limits to land governance reform Resnick, Danielle, Okumo, Austen, 2016-12-09 Over the last decade land governance has become a major priority for the development community 1 A particular focus has been on sub Saharan Africa due to the recognized paradox of high levels of land availability and low productivity in the region see Deininger et al 2012 While poor land governance systems have long been identified as a key reason for this disjuncture the relatively recent large scale impetus to improve land governance emerged from the inclusion of land management in 2009 as one of the four pillars under the African Union s Comprehensive Africa Agriculture Development Program CAADP Subsequently in the wake of the G 8 s launch of the New Alliance for Food Security and Nutrition in 2012 many international initiatives have emerged to promote better land governance These include the African Union s Land Policy Initiative AULPI and the World Bank s Land Governance Assessment Framework LGAF At the national level in Africa land registration and land titling are the most common approaches to reform Sikor and M ller 2009 with governments selecting among a broad spectrum of modalities to pilot These include rural land use plans in some francophone countries e g Benin Burkina Faso and C te d Ivoire systematic land tenure regularization Ethio pia Madagascar Rwanda and communal land demarcation and registration e g Ghana Mozambique Tanzania see Byamugisha 2013

Delivering Aid Without Government Tamer Qarmout, 2017-05-10 In a fragile and conflict ridden context such as the Gaza Strip where the de facto Hamas government faces isolation and lacks international recognition the provision of aid and development schemes challenges donors and CSOs delivering services to Palestinians This volume examines how international donors influenced the reconstruction and recovery policy agenda as well as its implementation Moreover as a result of the no contact policy recovery and reconstruction schemes were delivered with limited involvement from the de facto Hamas government raising questions about the efficacy of the governance without government concept This book examines the dynamics and the impact of international donors financing of Civil Society Organizations that were involved in the reconstruction of the Gaza Strip It expands on the existing analysis of transnational aid actors influence found in the public policy literature while contributing to our understanding of the concrete and more specific impact of international donors financing on the livelihoods of the Palestinian people

Artists of the Possible Matthew Grossmann, 2014 This book presents a new view of American policymaking focusing on networks of actors responsible for policymaking Policy change is not easily predictable from election results or public opinion because compromise and coalitions among individual actors make a difference in all three branches of government The amount of government action the issue content of policy changes and the ideological direction of policy all depend on the joint actions of executive officials legislators and interest group leaders The patterns of cooperation among policymakers and activists make each issue area and time period different from the others and undermine attempts to build an unchanging unified model of American policymaking In Artists of the Possible Matt Grossman

undertakes a rigorous content analysis of 268 books and articles on the history of 14 different major policy areas over 60 years compiling and integrating these findings to assess the factors that drive policymaking His findings which collectively uncover the 790 most significant policy enactments of the federal government and credit 1 306 specific actors for their role in policy change overturn established theories of policymaking First significant policy change does not follow from the issue agenda of the electorate or policymakers Second neither changes in public opinion nor the ideology or partisanship of government officials reliably influence the amount or content of policy change Instead the patterns of cooperation and compromise among political elites drive the productivity and ideological direction of policymaking Third the policymaking roles of public opinion elections and media coverage are all limited Fourth no typology can explain differences in policymaking across issue areas because the policy process is broadly similar except for a few idiosyncratic differences associated with each issue area

Contesting Trade in Central America Rose J. Spalding, 2014-04-15 In 2004 the United States five Central American countries and the Dominican Republic signed the Central American Free Trade Agreement CAFTA signaling the region's commitment to a neoliberal economic model For many however neoliberalism had lost its luster as the new century dawned and resistance movements began to gather force Contesting Trade in Central America is the first book length study of the debate over CAFTA tracing the agreement's drafting its passage and its aftermath across Central America Rose J Spalding draws on nearly two hundred interviews with representatives from government business civil society and social movements to analyze the relationship between the advance of free market reform in Central America and the parallel rise of resistance movements She views this dynamic through the lens of Karl Polanyi's double movement theory which posits that significant shifts toward market economics will trigger oppositional self protective social countermovements Examining the negotiations political dynamics and agents involved in the passage of CAFTA in Costa Rica El Salvador and Nicaragua Spalding argues that CAFTA served as a high profile symbol against which Central American oppositions could rally Ultimately she writes post neoliberal reform involves not just the design of appropriate policy mixes and sequences but also the hard work of building sustainable and inclusive political coalitions ones that prioritize the quality of social bonds over raw economic freedom

Terrorism Financing and State Responses Jeanne K. Giraldo, Harold A. Trinkunas, 2007 This book takes a broadly comparative approach to analyzing how the financing of global jihadi terrorist groups has evolved in response to government policies since September 11 2001

The ^AOxford Handbook of Comparative Foreign Relations Law Curtis A. Legislative Institutions and Lawmaking in Latin America Eduardo Alemán, George Tsebelis, 2016-05-27 In this

volume twelve experts on Latin American politics investigate the ways in which the interaction between legislative institutions and the policy positions of key actors affects the initiation and passage of legislation covering seven Latin American Countries Argentina Brazil Chile Colombia Mexico Peru and Uruguay These seven presidential systems vary widely in terms of their legislative institutions and the position of relevant actors The introduction provides a framework to understand the interaction of legislative majorities political institutions and policy position and each chapter begins with a description of the constitutional and congressional rules that allocate powers to propose amend and veto legislation The authors then identify the political actors who have these prerogatives and apply the framework to show how their policy positions and relative strengths influence legislative decision making The findings are consistent with the basic argument of the book that presidents with extensive legislative powers may be constrained by the positions of their legislative allies whereas weaker presidents may be well positioned to build successful coalitions to achieve their legislative goals The essays in this volume demonstrate that institutional design which determines the allocation of legislative powers must be considered along with the policy preferences of key legislative actors in order to construct a full picture of law making Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford
