The Theory and Practice of Irregular Warfare Andrew Mumford, Bruno C Reis, 2013-11-26 This book offers an analysis of key individuals who have contributed to

both the theory and the practice of counterinsurgency COIN Insurgencies have become the dominant form of armed conflict around the world today The perceptible degeneration of the occupations of Iraq and Afghanistan into insurgent quagmires has sparked a renewal of academic and military interest in the theory and practice of counterinsurgency In light of this this book provides a rigorous analysis of those individuals who have contributed to both the theory and practice of counterinsurgency warrior scholars These are soldiers who have bridged the academic military divide by influencing doctrinal and intellectual debates about irregular warfare Irregular warfare is notoriously difficult for the military and scholarly understanding about this type of warfare is also problematic especially given the residual anti intellectualism within Western militaries Thus The Theory and Practice of Irregular Warfare is dedicated to analysing the best perceivable bridge between these two worlds The authors explore the theoretical and practical contributions made by a selection of warrior scholars of different nationalities from periods ranging from the French colonial wars of the mid twentieth century to the Israeli experiences in the Middle East from contributions to American counter insurgency made during the Iraq War to the thinkers who shaped the US war in Vietnam This book will be of much interest to students of counterinsurgency strategic studies defence studies war studies and security studies in general [When Bad States Win](#) Jeffrey Treistman,2022-07-19 There is a common assumption that the promotion of democracy and economic development are the most effective means of quelling widespread political unrest within a country Many believe that free and fair elections health care education and employment will help secure the hearts and minds of citizens By contrast the violation of human rights and international law is presumed to be counterproductive engendering political protest and violent rebellion When Bad States Win challenges the belief that democratic institutions and economic growth are effectual tools in countering insurgencies Jeffrey Treistman uses a mixed methods approach to examine the conditions in which governments have violated human rights and attacked civilians to effectively suppress political dissent His research suggests that moderate levels of violence against civilians tend to backfire and only provoke widespread resentments that lead to the overthrow of a central government however when pursued to extremes brutal repression and indiscriminate violence against civilians can effectively defeat a rebellion As a result bad states may sometimes win As the number of democratic states in the world continues to decline violence and authoritarian rule are on the rise A thought provoking and timely analysis When Bad States Win offers important insight into how democratic states can respond to human rights violations in regions in crisis [Life During Wartime](#) Kristian Williams,Lara Messersmith-Glavin,William Munger,2013-09-09 Together the writers sound a sobering warning the American government is an iron fist in a velvet glove whose purpose remains preserving the status quo and enriching the rich Publishers Weekly What happens when the techniques of counterinsurgency developed to squash small skirmishes and guerrilla wars on the border of Empire blend into the state s apparatus for domestic policing In Life During Wartime fifteen authors and activists reflect on the American domestic security apparatus detailing the increasing militarization of the police

force and the re emergence of infiltration and counter intelligence as surveillance strategies highlighting the ways that the techniques and the technologies of counterinsurgency have been applied on the home front and offering strategies for resistance Includes contributions Kristian Williams Will Munger Walidah Imarisha George Ciccariello Maher Beriah Empie Elaine Brown Geoffrey Boyce Conor Cash Vicente L Rafael Alexander Reid Ross Evan Tucker Layne Mullett Sarah Small and Luce Guillen Givins

Bullets Not Ballots Jacqueline L. Hazelton,2021-05-15 In *Bullets Not Ballots* Jacqueline L Hazelton challenges the claim that winning hearts and minds is critical to successful counterinsurgency campaigns Good governance this conventional wisdom holds gains the besieged government popular support denies support to the insurgency and makes military victory possible Hazelton argues that major counterinsurgent successes since World War II have resulted not through democratic reforms but rather through the use of military force against civilians and the co optation of rival elites Hazelton offers new analyses of five historical cases frequently held up as examples of the effectiveness of good governance in ending rebellions the Malayan Emergency the Greek Civil War the Huk Rebellion in the Philippines the Dhofar rebellion in Oman and the Salvadoran Civil War to show that although unpalatable it was really brutal repression and bribery that brought each conflict to an end By showing how compellence works in intrastate conflicts *Bullets Not Ballots* makes clear that whether or not the international community decides these human moral and material costs are acceptable responsible policymaking requires recognizing the actual components of counterinsurgent success and the limited influence that external powers have over the tactics of counterinsurgent elites

Human Factors in Effective Counter-Terrorism Richard Warnes,2024-02-29 This book seeks to provide a comparative assessment of the significance of human factors in effective counter terrorism The phrase human factors is used to describe personal relationships individual capabilities effective leadership technical interface organisational culture and the community engagement necessary to effectively minimise counter and control the threat of terrorism Unlike many works in the field this book is constructed around the input of experienced knowledge from over 170 semi structured interviews of specialist military policing intelligence and security practitioners those actors actually involved in countering terrorism These practitioners come from seven countries the United Kingdom Ireland France Spain Israel Turkey and the United States all of which have suffered over the years from different types of terrorist threat and responded with a mixture of counter terrorist measures Where military practitioners also

discussed overseas counter insurgency measures that material has been included since terrorism forms a key aspect of such wider insurgencies The resulting interview data was analysed through a variant of Grounded Theory to identify key emerging themes and issues both positive and negative relevant to human factors in the individual countries and more generically This book incorporates the informed operational experiences and insights of the interviewees while seeking to provide examples of successful counter terrorist measures at the strategic operational and tactical levels This book will be of much interest to students of counter terrorism defence studies and security studies in general
