

Inconvenient Truth

Discussion Questions

Background

1. A quote often attributed to Mark Twain states,

"What gets us into trouble is not what we don't know. It's what we know for sure that just ain't so."

How does this relate to Pangaea and the Theory of Plate Tectonics?

The idea that the continents fit together was rejected by many for along time, as the notion of entire land masses moving was simply too unbelievable. This, of course, turned out to be true.

Tech-Graphic

2. The sun emits three main wavelengths of energy that reach the earth. Which is responsible for global warming?

- a. Infrared
- b. Ultraviolet
- c. Visible

3. A clip from the Futurama episode *Crimes of the Hot* is shown. At the end of the clip, global warming is "solved" by dropping larger and larger ice cubes into the ocean.

- a. How is this a metaphor for how global warming has been handled in the real world?
The problem isn't really being dealt with or given any urgency. We may be forced to come up with a last-minute solution.

- b. Assume that humanity had the technology to mine and transport large amounts of ice from other planets to the Earth. Why would this solution not actually work?

Among other problems, as the ice in the ocean melted, it would cause sea levels to rise, creating a massive amount of flooding in coastal areas.
