Nomads in the Middle East , The Animal Names of the Arab Ancestors William C. Young, 2024-02-06 In the Arab world people belong to kinship groups lineages and tribes Many lineages are named after animals birds and plants Why This survey evaluates five old explanations totemism emulation of predatory animals ancestor eponymy nicknaming and Bedouin proximity to nature It suggests a new hypothesis Bedouin tribes use animal names to obscure their internal cleavages Such tribes wax and wane as they attract and lose allies and clients they include attached elements as well as actual kin To prevent outsiders from spotting attached groups Bedouin tribes scatter non human names across their segments making it difficult to link any segment with a human ancestor Young s argument contributes to theories of tribal organization Arab identity onomastics and Near Eastern kinship

Becoming Arab Yossef Rapoport, 2025-11-18 How late medieval Middle Eastern peasants adopted Arab cultural identities and formed village clans During the later Middle Ages peasants in Egypt and Greater Syria came to view themselves as members of Arab clans that had originated in the Arabian Peninsula They expressed their Arab identity by wearing Arab headgear adopting an Arab dialect and circulating a new genre of popular epic that told heroic tales of pre Islamic Arabia In *Becoming Arab* Yossef Rapoport argues that this proliferation of Arab village clans did not come about through mass migration and displacement but reflected an internal transformation Drawing on extensive documentary literary administrative and material evidence

Rapoport shows that the widespread formation of Arab village clans in late medieval Egypt and Greater Syria was a gradual process the result of mass rural conversion to Islam and a new landholding regime in which peasants shifted from being landowners to being tenants After the eleventh century Rapoport contends Middle Eastern villagers were turning Arab These Arab village clans were not merely administrative regimes imposed from above villagers enthusiastically embraced their new identities New converts to Islam adopted Arab lineages to claim status and as a counter identity to urban based Turkish elites Arab identity was used by clans to mobilize rural uprisings against the ruling sultans and to resolve disputes among villagers Challenging traditional historiography of the Middle East which views Arab clansmen as pastoralists whose identity separated them from that of the wider peasantry Rapoport argues that the pervasive establishment of Arab village clans was the most important development in the history of the Middle Eastern countryside in the Islamic era *Mamlūk Studies Review*, 2008
