population **Handbook of Learning Disabilities** H. Lee Swanson, Karen R. Harris, Steve Graham, 2013-02-14 This comprehensive handbook reviews the major theoretical methodological and instructional advances that have occurred in the field of learning disabilities. With contributions from leading researchers, the volume synthesizes a vast body of knowledge on the nature of learning disabilities, their relationship to basic psychological and brain processes, and how students with these difficulties can best be identified and treated. Findings are reviewed on ways to support student performance in specific skill areas, including language arts, math, science, and social studies, as well as general principles of effective instruction that cut across academic domains. Authoritative and up to date, the book also examines the concepts and methods that guide learning disability research and identifies promising directions for future investigation.

Methods of Introducing System Models into Agricultural Research Lajpat R. Ahuja, Liwang Ma, 2020-01-22 Why model Agricultural system models enhance and extend field research to synthesize and examine experiment data and advance our knowledge faster to extend current research in time to predict best management systems and to prepare for climate change effects on agriculture? The relevance of such models depends on their implementation. *Methods of Introducing System Models into Agricultural Research* is the ultimate handbook for field scientists and other model users in the proper methods of model use. Readers will learn parameter estimation, calibration, validation, and extension of experimental results to other weather conditions, soils, and climates. The proper methods are the key to realizing the great potential benefits of modeling an agricultural system. Experts cover the major models with the synthesis of knowledge that is the hallmark of the *Advances in Agricultural Systems Modeling* series.

European Car, 2006 *The Language of Mass Shooter Manifestos* Emily Powell, 2025-05-30 Bringing together scholarship from corpus linguistics, forensic linguistics, and criminology, this book offers a nuanced exploration of moral agency in the pre-crime narratives of offenders. The volume seeks to complement existing literature in forensic linguistics, which often explores criminal narratives elicited after the crime with the benefit of hindsight, by examining texts written in the midst of events. Analyses draw on a corpus of over 200,000 words of manifestos and diaries written by four lone attackers who perpetrated mass shootings and put together accounts of their lives and the preparation for their crimes. Incorporating stylistic approaches to non-fiction texts with those from corpus linguistics, Powell explores the ways in which these texts influence perpetrators and future offenders and more broadly the role of narrative as it relates to harmful actions. A closing section includes a taxonomy of moral agency which may serve as the foundation for future research on understanding agency, responsibility, and offending from a linguistic perspective. This book will be of interest to scholars in forensic linguistics, corpus linguistics, stylistics, and criminology.
