Globalism in the Middle Ages and the Early Modern Age Albrecht Classen,2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable *What the Bleep Do We Know!?*TM William Arntz,Betsy Chasse,Mark Vicente,2010-01-01 Do you want to take a trip down the rabbit hole Get ready because that s exactly what you ll do when you open this book Never before has a self help book so dramatically altered the status quo or reality for that matter With a genre busting breakthrough format and layout the graphics colors and concepts compel readers to ask themselves Great Questions that will recreate their lives as they know them With the help of 14 leading quantum physicists scientist and spiritual thinkers this book guides readers on a course from the scientific to the spiritual from the universals to the deeply personal Along the way it asks such questions as Are we seeing the world as it really is What are thoughts made of What is the relationship between our thoughts and our world Are we biologically addicted to certain emotions Can I create my ideal day every day The answer to the last question is a resounding yes you are an infinite set of possibilities and you can choose every day which reality you want to create for yourself This book shows you how Oversized hardcover Full color throughout Active page design featuring boxes pull outs and exercises More than 50 movie stills photos and illustrations New interviews and theories More than 30 short chapters In this book a unique synergy is achieved between the interactive format full color graphics and the ability to take the complicated dense material of
