Congress,1995 Book Wars John B. Thompson,2021-03-04 This book tells the story of the turbulent decades when the book publishing industry collided with the great technological revolution of our time From the surge of ebooks to the self publishing explosion and the growing popularity of audiobooks Book Wars provides a comprehensive and fine grained account of technological disruption in one of our most important and successful creative industries Like other sectors publishing has been thrown into disarray by the digital revolution The foundation on which this industry had been based for 500 years the packaging and sale of words and images in the form of printed books was called into question by a technological revolution that enabled symbolic content to be stored manipulated and transmitted quickly and cheaply Publishers and retailers found themselves facing a proliferation of new players who were offering new products and services and challenging some of their most deeply held principles and beliefs The old industry was suddenly thrust into the limelight as bitter conflicts erupted between publishers and new entrants including powerful new tech giants who saw the world in very different ways The book wars had begun While ebooks were at the heart of many of these conflicts Thompson argues that the most fundamental consequences lie elsewhere The print on paper book has proven to be a remarkably resilient cultural form but the digital revolution has transformed the industry in other ways spawning new players which now wield unprecedented power and giving rise to an array of new publishing forms Most important of all it has transformed the broader information and communication environment creating new challenges and new opportunities for publishers as they seek to redefine their role in the digital age This unrivalled account of the book publishing industry as it faces its greatest challenge since Gutenberg will be essential reading for anyone interested in books and their future **Break the Stigma: Autism** Nichole E Scheerer ,April Hargreaves ,Catalina Sau Man Ng ,Matthew Daniel Lerner,2024-12-17 While awareness of neurodiversity and specific forms of neurodivergence such as autism has increased over the last few years autism stigma and prejudice against autistic people remains a critical issue that warrants further attention and investigation The experience of stigma and prejudice such as discriminatory actions and attitudes towards autistic individuals on both a personal and public level can have many negative impacts across one s lifetime These experiences can lead people on the autism spectrum and their families to avoid seeking help which can delay diagnosis and access to supportive services of not only autism itself but also co occurring physical and psychological health needs Prejudiced beliefs against autistic people may lead to many forms of discrimination including but not limited to medical education and employment discrimination These attitudes can be built into society at a systemic level and influence policies that govern access to supports and our communities Additionally autism stigma and prejudice against autistic people such as

stereotypical portrayals of autistic people in media and the language we use to describe autistic people can be invalidating to a person's autistic identity and to autistic culture. Further, the impacts of stigma and prejudice can be internalized by autistic individuals, which may not only have poor effects on their wellbeing but also increase the want and/or need to mask or camouflage to pass as non-autistic. Masking or camouflaging can reduce a person's sense of belonging, self-esteem, sense of self-worth, and close relationships, all of which are associated with poor outcomes. It can also lead to avoidance of opportunities such as connection with other autistic individuals that could increase quality of life. This Research Topic aims to showcase evidence on why the stigma surrounding autism and the prejudice against autistic people are so detrimental. It hopes to provide insights into research and interventions on how stigma and prejudice can be tackled, as well as awareness, understanding, and acceptance, raised in the hope that the research presented will translate to best practice applications in clinical, public health, policy, and community settings. We invite researchers to submit a range of articles, including but not limited to original research, articles, reviews, meta-analyses, opinions, perspectives, and case reports, to provide new evidence on the following: Harmful impacts of stigma and prejudice on autistic people; Interventions on reducing stigma surrounding and prejudice against autistic people; Health promotion in autism, i.e. approaches that increase the mental and physical wellbeing of autistic people; Interventions targeted at increasing understanding of autism and neurodiversity, as well as increasing acceptance and advocacy, as well as allyship with autistic people; Examining intersectionality in autism stigma and/or prejudice towards autistic people of diverse backgrounds. **The Columbia Journal of Law & the Arts**, 2001
