## CABINET OPENING DIMENSIONS

## VENTING REQUIREMENTS

### Roof venting

### Wall venting

### Recommended standard fittings

If the existing vent is round, a rectangular-to-round adapter must be used and a rectangular 3" extension vent between the damper assembly and the adapter must be installed to prevent sticking of the exhaust damper.

### For wall or roof venting methods:

If the wall exhaust method is chosen, be sure that there is proper clearance within the wall for the exhaust vent.

Wall and roof caps must have back-draft damper.

### We recommend:

- ✓ using rigid metal vent.
- ✓ that length of vent and number of elbows should be kept to a minimum to provide efficient performance.
- ✓ that size of vent should be uniform.
- ✓ using duct tape to seal all joints in the vent system.
- ✓ using caulking compound to seal exterior wall or roof opening around cap.
- ✓ two elbows should not be installed together.

### We do NOT recommend:

- ✓ flexible metal vent.

**NOTE:** If flexible metal vent must be used, calculate each foot of flexible metal vent as two feet of rigid metal vent. Flexible metal elbows count twice as much as standard elbows.

### Recommended vent length

Use 3-1/4" x 10" or 6" vent. The total length of the vent system including straight vent, elbows, transitions, wall or roof caps must not exceed the equivalent of 140 feet of 3-1/4" x 10" rectangular or 6" diameter round vent. For best performance, use no more than three 90° elbows. To calculate the length of system you need, add the equivalent feet for each vent piece used in the system. See examples below.

### 3-1/4" x 10" vent system

### 6" vent system

Gallouj, F. Djellal, 2011-11-01 This book represents a significant step towards dealing with the lacuna constituted by the inadequacy of the literature on the services. And as such it approaches its task from a variety of directions. From the foreword by William J Baumol New York University US The Handbook of Innovation and Services is an exceptional volume. Its contributors including Fa z Gallouj William Baumol Jean Gadrey and Pascal Petit are among the major thinkers in both the fields of the economics of services and the economics of innovation. Selected topics include the cost disease services innovation in the global economy social innovation in the services and innovation and employment in services. The book I am sure will become a standard reference volume in both these fields in the ensuing years. Edward Wolff New York University US This Handbook brings together 49 international specialists to address an issue of increasing importance for the world's post industrial economies innovation as it relates to services. Contemporary economies have two fundamental characteristics. Firstly they are service economies in as much as services account for more than 70 per cent of the wealth and jobs in most developed countries. Secondly they are innovation economies as recent decades have seen an unprecedented development of scientific technological organisational and social innovations. This Handbook expertly links these two major characteristics in order to investigate the role of innovation in services an issue that until now has been inadequately explored and one that poses many theoretical and operational challenges. This comprehensive volume encompasses the views of eminent scholars from a range of disciplines including economics management sociology and geography and draws on a number of different analytical and methodological perspectives. With its multi disciplinary approach this Handbook will be an invaluable reference source for academics and students in the fields of economics management and the geography of services and innovation. Public authorities and managers in the service sector will also find this book fascinating. **Handbook of Service Science** Paul P. Maglio, Cheryl A. Kieliszewski, James C. Incorporating work by scholars from across the spectrum of service research the volume presents multidisciplinary perspectives on the nature and theory of service on current research and practice in design operations delivery and innovation of service and on future opportunities and potential of service research.
