To Save Everything Click Here The Folly Of Technological Solutionism:

To Save Everything, Click Here Evgeny Morozov, 2013-03-05 A New York Times Notable Book of the Year In the very near future smart technologies and big data will allow us to make large scale and sophisticated interventions in politics culture and everyday life Technology will allow us to solve problems in highly original ways and create new incentives to get more people to do the right thing But how will such solutionism affect our society once deeply political moral and irresolvable dilemmas are recast as uncontroversial and easily manageable matters of technological efficiency What if some such problems are simply vices in disguise What if some friction in communication is productive and some hypocrisy in politics necessary The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behavior But when we change the motivations for our moral ethical and civic behavior we may also change the very nature of that behavior Technology Evgeny Morozov proposes can be a force for improvement but only if we keep solutionism in check and learn to appreciate the imperfections of liberal democracy Some of those imperfections are not accidental but by design Arguing that we badly need a new post Internet way to debate the moral consequences of digital technologies To Save Everything Click Here warns against a world of seamless efficiency where everyone is forced to wear Silicon Valley's digital straitjacket **To Save Everything, Click Here** Evgeny

Morozov, 2013-03-21 To Save Everything Click Here the new book by the acclaimed author of The Net Delusion Evgeny Morozov is a penetrating look at the shape of society in the digital age of the direction in which the 21st Century may take us and of the alternate paths we can still choose Our society is at a crossroads Smart technology is transforming our world making many aspects of our lives more convenient efficient and in some cases fun Better and cheaper sensors can now be embedded in almost everything and technologies can log the products we buy and the way we use them But argues Evgeny Morozov technology is having a more profound effect on us it is changing the way we understand human society In the very near future technological systems will allow us to make large scale and sophisticated interventions into many more areas of public life These are the discourses by which we have always defined our civilisation politics culture public debate morality humanism But how will these discourses be affected when we delegate much of the responsibility for them to technology The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behaviour Yet when we change the motivations for our moral ethical and civic behaviour do we also change the very nature of that behaviour Technology Morozov proposes can be a force for improvement but only if we abandon the idea that it is necessarily revolutionary and instead genuinely interrogate why and how we are using it From urging us to drop outdated ideas of the internet to showing how to design more humane and democratic technological solutions To Save Everything Click Here is about why we should always question the way we use technology A devastating exposé of cyber utopianism by the world's most far seeing Internet guru John Gray author of Straw Dogs Evgeny Morozov is

the most challenging and best informed critic of the Techno Utopianism surrounding the Internet If you've ever had the nagging feeling as you spoon down your Google that there's no such thing as a free lunch Morozov's book will tell you how you might end up paying for it Brian Eno This hard hitting book argues people have become enslaved to the machines they use to communicate It is incisive and beautifully written whether you agree with Morozov or not he will make you think hard Richard Sennett author of Together Praise for The Net Delusion Gleefully iconoclastic not just unfailingly readable it is also a provocative enlightening and welcome riposte to the cyberutopian worldview Economist A passionate and heavily researched account of the case against the cyberutopians only by becoming cyberrealists can we hope to make humane and effective policy Bryan Appleyard New Statesman Piercing convincing timely Financial Times Evgeny Morozov is the author of The Net Delusion The Dark Side of Internet Freedom which was the winner of the 2012 Goldsmith Book Prize and a contributing editor for The New Republic Previously he was a visiting scholar at Stanford University a Schwartz fellow at the New America Foundation a Yahoo fellow at the Institute for the Study of Diplomacy at Georgetown and a fellow at the Open Society Foundations His monthly column on technology comes out in Slate Corriere della Sera El Pais Frankfurter Allgemeine Zeitung and several other newspapers He's also written for the New York Times The Economist the Wall Street Journal the Financial Times and the London Review of Books

SUMMARY: To Save Everything, Click Here: The Folly Of Technological Solutionism By Evgeny Morozov Shortcut Edition, 2010 **To Save Everything, Click Here** Evgeny Morozov, 2014 Argues that technology is changing the way we understand human society and discusses how the disciplines of politics culture public debate morality and humanism will be affected when responsibility for them is delegated to technology

Handbook of Research on Deconstructing Culture and Communication in the Global South Okocha, Desmond Onyemehi, Yousaf, Muhammad, Onobe, Melchizedec J., 2023-07-10 There are inequalities in global knowledge production in communication outlets cultural practices and governance problems Under this symbiotic relationship they reinforce the cultural ideas values and governance systems operating in the Western countries as an ideal and role model for the Global South countries Media is regarded as the agent of change for communication and cultural values Indigenous knowledge production and dissemination is an essential feature to get a better insight into Global South countries Likewise dewesternizing and demystifying societal culture and governance issues are pertinent in this age of information The Handbook of Research on Deconstructing Culture and Communication in the Global South focuses on local production practices keeping in view the local needs of communication outlets and societal and cultural sensitivities This Indigenous knowledge would provide deeper and richer insights into the problems and sensitivities of Global South countries To achieve this end this book adopts a broader approach encompassing development issues democratic values digitalization practices gender equality issues and more Covering topics such as biocultural activism language ideology and religiocentrism this major reference work is a valuable resource for graduate students sociologists government officials students and educators

Digital Humanities and Libraries and Archives in Religious Studies Clifford B. Anderson, 2022-02-07 How are digital humanists drawing on libraries and archives to advance research and learning in the field of religious studies and theology How can librarians and archivists make their collections accessible to digital humanists The goal of this volume is to provide an overview of how religious and theological libraries and archives are supporting the nascent field of digital humanities in religious studies The volume showcases the perspectives of faculty librarians archivists and allied cultural heritage professionals who are drawing on

primary and secondary sources in innovative ways to create digital humanities projects in theology and religious studies Topics include curating collections as data conducting stylometric analyses of religious texts and teaching digital humanities at theological libraries The shift to digital humanities promises closer collaborations between scholars archivists and librarians The chapters in this volume constitute essential reading for those interested in the future of theological librarianship and of digital scholarship in the fields of religious studies and theology

Are Libraries Obsolete? Mark Y. Herring, 2014-01-23 The digital age has transformed information access in ways that few ever dreamed But the afterclap of our digital wonders has left libraries reeling as they are no longer the chief contender in information delivery The author gives both sides the web aficionados some of them unhinged and the traditional librarians some blinkered a fair hearing but misconceptions abound Internet be all and end all enthusiasts are no more useful than librarians who urge fellow professionals to be all things to all people The American Library Association wildly democratic at its best and worst appears schizophrenic on the issue unhelpfully My effort here says the author is to talk about the elephant in the room Are libraries obsolete No concludes the author also The book explores how libraries and librarians must and certainly can continue to be relevant vibrant and enduring

No Such Thing as a Free Gift Linsey McGoey, 2015-10-20 Philanthro capitalism How charity became big business The charitable sector is one of the fastest growing industries in the global economy Nearly half of the more than 85 000 private foundations in the United States have come into being since the year 2000 Just under 5 000 more were established in 2011 alone This deluge of philanthropy has helped create a world where billionaires wield more power over education policy global agriculture and global health than ever before In *No Such Thing as a Free Gift* author and academic Linsey McGoey puts this new golden age of philanthropy under the microscope paying particular attention to the Bill and Melinda Gates Foundation As large charitable organizations replace governments as the providers of social welfare their largesse becomes suspect The businesses fronting the money often create the very economic instability and inequality the foundations are purported to solve We are entering an age when the ideals of social justice are dependent on the strained rectitude and questionable generosity of the mega rich

Late Capitalism Ernest Mandel, 2024-07-30 Late Capitalism is the first major synthesis to

have been produced by the contemporary revival of Marxist economics. It represents in fact the only systematic attempt so far ever made to combine the general theory of the laws of motion of the capitalist mode of production developed by Marx with the concrete history of capitalism in the twentieth century. Mandel's book starts with a challenging discussion of the appropriate methods for studying the capitalist economies. He seeks to show why the classical approaches of Luxemburg, Bukharin, Bauer and Grossman failed to accomplish the further development of Marxist theory whose urgency became evident after Marx's death. He then sketches the structure of the world market and the variant types of surplus profit that have characterized its successive stages. On these foundations, Late Capitalism proceeds to advance an extremely bold schema of the long waves of expansion and contraction in the history of capitalism from the Napoleonic Wars to the present. Mandel criticizes and refines Kondratieff's famous use of the notion. Mandel's book surveys in turn the main economic characteristics of late capitalism as it has emerged in the contemporary period. The last expansionary long wave, it argues, started with the victory of fascism on the European continent and the advent of the war economies in the US and UK during the 1940s and produced the record world boom of 1947-72. Mandel discusses the reasons why the dynamic upswing of growth in this period was bound to reach its limits at the turn of the 1970s and why a long wave of economic stagnation and intensified class struggle has set in today. Late Capitalism is a landmark in Marxist economic literature. Specifically designed to explain the international recession of the 1970s, it is a central guide to understanding the nature of the world economic crisis today.

U.C. Davis Law Review University of California, Davis. School of Law, 2014-04 **Florida Law Review**, 2015 **AI Futures** Evgeny Morozov, 2025-04-29. A sober assessment of AI today and a bold vision for what it could be. Generative AI tools released by a handful of rich tech companies are remaking the economy, society and human life as we know it. Must their vision be our common destiny? Leading a forum, acclaimed technology writer Evgeny Morozov, author of *To Save Everything*, [Click Here](#) and host of the podcast *A Sense of Rebellion*, takes a hard look at Silicon Valley's grip on our technological imagination. The prevailing wisdom says we can be complacent realists, erecting a few guardrails around Big Tech, or else total refuseniks rejecting this new technology altogether. That false choice runs roughshod over history, Morozov argues, and with it a more utopian vision of the role technology can play in our lives. To sketch a better AI future, Morozov takes us back to the past, showing how a radically different way of thinking about artificial intelligence once flourished before losing out to Cold War militarization, consumerism and venture capital. That more humane vision can still be won, but it requires being clear-eyed about the obstacles. Only by building political power, Morozov concludes, can we wrench control of AI from Silicon Valley and build a technological future that serves us all. Forum respondents include musician Brian Eno, computer scientist and AI pioneer Terry Winograd, free software activist and former digital minister of Taiwan Audrey Tang, technologist Bruce Schneier, writer and software engineer Wendy Liu, and journalist Edward Ongweso Jr. Also in this issue, Joelle M.
