

An aerial photograph of a landscape. In the foreground, there is a green field with several large, dark, rectangular mounds of earth or vegetation. A dirt road or path winds through the middle ground, flanked by trees and shrubs. In the background, a river or body of water is visible, with a small bridge or structure crossing it. The overall scene is a mix of natural and human-made elements.

Vetiver System Improving Water Quality:

The Vetiver System for Improving Water Quality Paul Truong, Tran Tan Van, Elise Pinners, 2008 The Vetiver System relies on a unique tropical plant vetiver grass that has been proven and used in some 100 countries for soil and water conservation slope stabilization land rehabilitation pollution control water quality improvement disaster mitigation and many other environmental applications that can mitigate the impact of global warming and climate change The world and its people particularly in the poorer countries located in tropical and semi tropical countries face major environmental and health problems due to the contamination of water and land The Vetiver System provides one solution to deal with these problems This well color illustrated handbook focuses on improving water quality and has been written for planners technicians and communities to show how the technology has been used in the recent past and how it can be used in the future

Hybridized Technologies for the Treatment of Mining Effluents Elvis Fosso-Kankeu, Bhekhe B. Mamba, 2023-07-19 HYBRIDIZED TECHNOLOGIES FOR THE TREATMENT OF MINING EFFLUENTS The main goal of this book is to review the principles development and performances of hybridized technologies that have been used for the treatment of mine effluents Recent developments consist of the integration hybridization of technologies to achieve the effective removal of pollutants from acid mine drainage AMD effluents in a stepwise manner such as to ensure that the cost of the process is minimized and the resulting water is fit for purpose This book presents eight specialized chapters that provide a state of the art review of the different hybridized technologies that have been developed over the years for the treatment of mine effluent including AMD The successful implementation and challenges of these technologies are highlighted to give the reader a perspective on the management of such waste in the mining industry In this innovative book readers will be introduced to The limitations of passive and active treatment processes as stand alone technologies while appraising the functioning and performances of these technologies when combined to address their challenges The numerous approaches that have been considered over the years for effective combination of these technologies are explored taking into account their successful implementation at large scale as well as the long term sustainability Audience This book will be of interest to academic researchers from the fields of environment chemistry engineering mineral processing hydrometallurgy geochemistry and professionals including mining plant operators environmental managers in the industries water treatment plants managers and operators water authorities government regulatory bodies officers and environmentalists

Phytoremediation Potential of Perennial Grasses D.P. Singh, Vimal Chandra Pandey, 2020-03-27 Phytoremediation Potential of Perennial Grasses provides readers with the knowledge to select specific perennial grass species according to site specific needs In addition it demonstrates the potential opportunities for grass based phytoremediation to yield phytoproducts especially biomass based bioenergy and aromatic essential oils as a green economy while in the process of remediating contaminated sites The book brings together recent and established knowledge on different aspects of grass

based phytoremediation providing this information in a single source that offers a cutting edge synthesis of scientific and experiential knowledge on polluted site restoration that is useful for both practitioners and scientists in environmental science and ecology Provides a holistic approach to grass based phytoremediation covering the ecological economic and social issues related to its management Addresses the key role that grass based phytoremediation plays in maintaining ecosystem services in polluted sites Includes strategies to mitigate costs related to the phytoremediation of polluted sites

Biodegradation Technology of Organic and Inorganic Pollutants Kassio Ferreira Mendes,Rodrigo De Sousa,Kamila Cabral Mielke,2022-04-20 Bioremediation technologies for environments contaminated by organic and inorganic pollutants are a major focus of researchers and scientists worldwide The chemical control of agricultural pests and advocacy for sustainable agriculture have led to the development of new paradigms in environmental remediation This book covers recent advances in the bioremediation technology of organic and inorganic pollutants in the environment Soil Biology and Agriculture in the Tropics Patrice Dion,2010-02-04 The relationships between soils microbes and humans are of crucial relevance in the tropics where plant stress and microbial activity are exacerbated This volume of Soil Biology presents the living component of tropical soils showing how it is shaped by environmental conditions and emphasizing its dramatic impact on human survival and well being Following an introduction to the specificities of tropical soils and of their microbial communities the biological aspects of soil management are examined dealing with land use change conservation and slash and burn agriculture the restoration of hot deserts agroforestry and paddy rice cultivation As they are of particular relevance for tropical agriculture symbioses of plants and microbes are thoroughly covered as are the biodegradation of pesticides and health risks associated with wastewater irrigation Lastly traditional soil knowledge is discussed as a key to our sustainable presence in this world The Vetiver System for Improving Water Quality Paul Truong,2015-12-01 This book originally published in 2008 has been completely revised to reflect the significant gains in knowledge both research and field experience that has occurred in most parts of the tropics and semi tropics over the past seven years relating to phytoremedial applications of the Vetiver System Over that time Vetiver System applications for the decontamination or containment of polluted water and land has shown significant success and as a result there is a growing interest in its application for the mitigation of many water land related problems that are nowadays often overwhelming communities both rural and urban due to poverty population pressures lack of public financing and climate change The applications described in this book can be used at various scales by a very wide range of users and have particular potential for providing the means for communities to create resilience to climate change and environmental disaster at low cost often independent from formal public services that will allow a more secure and better quality of life An important objective of this is to introduce the Vetiver System to planners design engineers and other potential users who continue to be unaware of the effectiveness of the Vetiver System for improving water quality particularly that associated with effluent discharge and leachate flows from

industrial sites contaminated mining sites polluted urban domestic waste water and sadly and more too often agro chemical contaminated farm land The book is well illustrated with many color photos figures and tables that support the text

Pollutants and Water Management Pardeep Singh,Rishikesh Singh,Vipin Kumar Singh,Rahul Bhadouria,2021-05-04
