

Insert batteries in correct position into the battery holder.

Push the reset button located either on the back or the side of the clock.

Turn the hand setting knob on the back of the clock to set the time.

Close the battery cover(s).

To activate the hourly melody and motion, slide the ON//OFF switch located either on the back or the side of the clock to "ON" position.

a) One melody plays at the top of the hour, and multiple melodies automatically change one after another every hour.

b) The melody may not activate properly when the clock reaches the first hour position after the time is set or the reset button is pressed. This is not defect and the clock will activate properly from the next hour onwards.

To inactivate the hourly melody and motion, slide the ON//OFF switch located either on the back or the side of the clock to "OFF" position.

To adjust volume of the melody sound, turn the VOLUME control knob located either on the back or the side of the clock while the melody is playing.

To demonstrate the melody and motion, simply press the MONITOR button located either on the side of the clock or at the lower front of the clock.

a) You can enjoy by yourself or show other people playing the melody and motion at any time you want, just pressing the MONITOR button.

b) This function always works regardless the ON/OFF switch position.

Hang the clock firmly, straight and vertically.

AUTOMATIC NIGHT SHUT-OFF :

This clock is equipped with a light sensor. It detects the light and make the function of the melody and motion activate. On the contrary, it won't activate the melody and motion in the darkness. Therefore the melody and motion will be automatically shut off in the night when it gets dark.

Since the light sensor operates by the brightness (amount of the light) of the place where it is set, it might happen that the clock does not play the melody and motion in the dim place.

BASIC STRUCTURE

Note: This drawing shows basic structure.
Total shape and location of each parts may differ model by model,
for example, some clocks have Monitor Button at lower front of the case.
