Wetland Archaeology And Environments Regional Issues Global Perspectives:

Wetland Archaeology & Environments Malcolm Lillie, Stephen Ellis, Helen Fenwick, 2007 For the past thirty years or so wetlands have been at the forefront of developments in understanding past cultural activity and associated landscapes Waterlogged environments and contexts not only preserve the organic part of the cultural record but they also provide an archive of the environmental conditions pertaining at the time the deposits form thereby allowing the detailed reconstruction of their associated environments and landscapes

Wetland Archaeology and Beyond Francesco Menotti, 2012-03-15 Despite being one of the most successful branches of mainstream archaeology wetland archaeology as an academic discipline is still relatively unknown We might have all heard of the wonderfully preserved organic artefacts and ecofacts found in waterlogged conditions but do we really know how they were preserved found retrieved and conserved for us to admire and study *Wetland Archaeology and Beyond* takes the reader through the fascinating biography of wetland archaeology from the dawn of the discipline to its remarkable achievements Through a discussion of a large variety of worldwide wetland archaeological sites and their material culture Menotti offers an appreciative study of the people who occupied these sites and who created the archaeological artefacts The volume also includes a comprehensive explanation of the procedures and research processes involved in archaeological practice and theory Focusing on the relationship between archaeological experts and the general public Menotti highlights the importance of this relationship for the future of the discipline as wetland ecosystems continue to disappear at an inexorable rate and with them our invaluable cultural heritage

The Oxford Handbook of Wetland Archaeology Francesco Menotti, Aidan O'Sullivan, 2013 This Handbook sets out the key issues and debates in the theory and practice of wetland archaeology which has played a crucial role in studies of our past Due to the high quantity of preserved organic materials found in humid environments the study of wetlands has allowed

archaeologists to reconstruct people's everyday lives in great detail

Persistent Traditions Luc W.S.W. Amkreutz, 2013-12-19 The adoption of agriculture is one of the major developments in human history Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area 5500-2500 cal BC It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about This work brings together a comprehensive array of excavated archaeological sites in the Lower Rhine Area Their analysis shows that the succession of

Late Mesolithic Swifterbant culture Hazendonk group and Vlaardingen culture societies represents a continuous long term tradition of inhabitation of the wetlands and wetland margins of this area forming a culturally continuous record of communities in the transition to agriculture After demonstrating the diversity of the Mesolithic the subsequent developments regarding Neolithisation are studied from an indigenous perspective Foregrounding the relationship between local communities and the dynamic wetland landscape the study shows that the archaeological evidence of regional inhabitation points to long term flexible behaviour and pragmatic decisions being made concerning livelihood food economy and mobility This disposition also influenced how the novel elements of Neolithisation were incorporated Animal husbandry crop cultivation and sedentism were an addition to the existing broad spectrum economy but were incorporated within a set of integrative strategies For the interpretation of Neolithisation this study offers a complementary approach to existing research Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites this study emphasises the persistent traditions of the communities involved New elements instead of bringing about radical changes are shown to be attuned to existing hunter gatherer practices By documenting indications of the mentalit of the inhabitants of the wetlands it is demonstrated that their mindset remained essentially Mesolithic for millennia This book is accompanied by a separate 422 page volume containing the appendices These constitute a comprehensive inventory of 159 mostly excavated archaeological sites in the Lower Rhine Area

Hunters, Fishers and Foragers in Wales Malcolm Lillie, 2015-07-31 Malcolm Lillie presents a major new holistic appraisal of the evidence for the Mesolithic occupation of Wales The story begins with a discourse on the Palaeolithic background In order to set the entire Mesolithic period into its context subsequent chapters follow a sequence from the palaeoenvironmental background through a consideration of the use of stone tools settlement patterning and evidence for subsistence strategies and the range of available resources Less obvious aspects of hunter forager and subsequent hunter fisher forager groups include the arenas of symbolism ritual and spirituality that would have been embedded in everyday life The author here endeavors to integrate an evaluation of these aspects of Mesolithic society in developing a social narrative of Mesolithic lifeways throughout the text in an effort to bring the past to life in a meaningful and considered way The term hunter fisher foragers implies a particular combination of subsistence activities but whilst some groups may well have integrated this range of economic activities into their subsistence strategies others may not have The situation in coastal areas of Wales in relation to subsistence settlement and even spiritual matters would not necessarily be the same as in upland areas even when the same groups moved between these zones in the landscape The volume concludes with a discussion of the theoretical basis for the shift away from the exploitation of wild resources towards the integration of domesticates into subsistence strategies i e the shift from food procurement to food production and assesses the context of the changes that occurred as human groups re orientated their socioeconomic political and ritual beliefs in light of newly available resources influences from the continent and ultimately

their social condition at the time of transition Preserving Archaeological Remains in Situ David Gregory, 2017-07-05 The PARIS 4 conference which took place at the National Museum of Denmark in 2011 attracted over 100 participants from 18 countries Delegates presented and discussed the latest developments in the field of Preserving Archaeological Remains In Situ These proceedings explore four major themes rates of degradation in archaeological remains and the limits of acceptable change the techniques and duration of monitoring on archaeological sites the role of multinational standards when the sites and national legislations are so variable reviewing the effectiveness of in situ preservation after nearly two decades of research A special issue of Conservation and Management of Archaeological Sites Vol 14 Nos 1 4 Archaeology from the Wetlands WARP (Project). Conference, John Barber, 2007 The proceedings of this conference bear witness to resurgence in Scottish wetland studies and offer an introduction to wetland sites as elements in the cultural landscapes of the world **The Archaeological Journal** , 2008 Chronology and Evolution Within the Mesolithic of North-West Europe Philippe Crombé, 2009 This volume gathers together 40 papers dealing with radiocarbon dates from 15 different countries

Wetlands James Fargo Balliett, 2010 This volume provides a fresh look at critical environmental issues as they pertain to the world's wetlands from an international viewpoint The goal of this book is to explore how human population growth and behavior have changed the world's wetlands especially in negative ways and how modern society has responded to the challenges these changes present often through increased educational efforts better conservation and management of the environment The first part of this work provides background information how the wetlands ecosystems formed the relative size and locations of the world's wetlands key animal and plant species that live in the wetlands and how the health of the wetlands affects our planet's environment as a whole The second part contains in depth chapters examining seven different geographically diverse locations An overview of each area details its unique features including geology weather conditions and endemic species The text also examines the health of the natural environment and discusses the local human population Short and long term environmental impacts are assessed and regional and international efforts to address interrelated social economic and environmental issues are presented in detail The third part of this book studies how the cumulative levels of pollution and aggressive resource consumption affect the wetlands on a global scale It provides readers with examples of local and regional ecological impacts as responses to these problems Sometimes these unique efforts have resulted in a balance between resource conservation and consumption **American Indian Quarterly** , 2006 **Archaeology International** , 1998 *Archaeology in Oceania* , 2005 *Natural Resources and Environmental Issues* , 2009 **Current**
