Whose Reality Counts Putting The First Last:

Whose Reality Counts? Robert Chambers, 1997 In this sequel to *Rural Development Putting the last first* Robert Chambers argues that central issues in development have been overlooked and that many past errors have flowed from domination by those with power Copyright Libri GmbH All rights reserved *Revolutions in Development Inquiry* Robert Chambers, 2012 Robert Chambers returns with a new book that reviews together for the first time some of the revolutionary changes in the methodologies and methods of development inquiry that have occurred in the past forty years and reflects on their transformative potential for the future This book breaks new ground by describing and analysing the evolution of a sequence of approaches Starting with the dinosaurs of large scale multi subject questionnaire surveys and the biased visits and perceptions of rural development tourism and urban based professionals there follows a look at the explosive proliferation of methodologies and methods of recent years These include rapid rural appraisal RRA participatory rural appraisal PRA and dramatic developments in the still largely unrecognized fields of participatory numbers and statistics and of participatory mapping and GIS Chambers shows how these can empower local people and provide rigorous and valid substitutes for some more traditional methods of inquiry Also presented is a repertoire for offsetting the biases of the urban trap which has become so serious for officials and aid agency staff Importantly Chambers points out that we are now in a different space methodologically from a few years ago He makes the case that participatory methodologies evolved through creative and eclectic pluralism can be a transformative wave for the future as drivers of personal professional and institutional change This book is for all who are concerned with development regardless of profession discipline or organization who seek to be abreast of the revolutionary breakthroughs in approaches and methods of inquiry of recent years and what Chambers calls their unlimited potentials Published with IDS *Nature Knowledge* Glauco Sanga, Gherardo Ortalli, 2004-11 Numerous scholars in particular anthropologists historians economists linguists and biologists have over the last few years studied forms of knowledge and use of nature and of the ways nature can be protected and conserved Some of the most prominent scholars have come together in this volume to reflect on what has been achieved so far to compare the work carried out in the past to discuss the problems that have emerged from different research projects and to map out the way forward **The Postcolonial Science and Technology Studies Reader** Sandra Harding, 2011-09-12 A collection of foundational and contemporary essays in postcolonial science studies *The Project in International Development* Caitlin Scott, 2023-06-26 The project has become fundamental to international development and humanitarian practice playing a key role in defining objectives funding streams and ultimately determining what success looks like This book provides a much needed overview of the project in international development practice guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design The book starts with an overview of the role of the project through development history before taking the reader through the stages of a standard project management cycle

Each chapter introduces the stage the most common tools used to support that phase of planning and the critical debates that exist around it with examples to illustrate discussions from around the world and a range of development fields The book explores the challenges to working effectively in contemporary aid contexts including the role of politics and the pressures wrought by the demands to demonstrate quantified results Throughout the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector Ending with suggestions for innovation this book is perfect for anyone looking for an accessible and engaging guide to the international development project whether student researcher or practitioner

Making Development Work Nagy Hanna, Robert Picciotto, Worldwide the number of poor people increased during the past decade despite technological improvements more open trade and improved policy frameworks in developing countries Regional conflicts adverse shifts in terms of trade and marginalization of poor countries in the new global economy explain this outcome This highlights the need to reform development assistance and improve its effectiveness *Making Development Work* examines the four key principles of the Comprehensive Development Framework a World Bank initiative currently being piloted in twelve developing countries The initiative promotes a holistic long term vision of development domestic ownership of development programs and focus on results and stronger partnership between government the private sector and the civil society The first section of the volume describes the evolution in development thinking that culminated in this new consensus The second focuses on country ownership of development policies and programs Based on empirical evidence it proposes a new view of the aid relationship as a mutual learning process The third section focuses on results and on the ways aid agencies might enhance development impact of their operations It concludes with a preliminary assessment of strategies for scaling up from specific projects to sector and programmatic approaches and suggests ways to adapt them to counter conditions The experience of a bilateral aid agency U S Agency for International Development USAID is examined in this context The fourth section focuses on partnership emphasizing that aid agencies must be explicit about the kinds of partnerships they seek with countries and the kinds of strategic selectivity they will exercise The final chapter pulls together the lessons of development experience at various levels of operation It outlines key tensions between comprehensiveness and selectivity ownership and conditionality speed and broad based ownership focus on results and poor local evaluation capacity and enhanced country focus and globalization Promising approaches to manage these tensions are put forward to replace one size fits all prescriptions with client empowerment and social learning *Making Development Work* offers rich lessons on improving the effectiveness of aid It will be of particular interest to development practitioners students and professors of development economics studies Nagy Hanna is a lead corporate strategist and evaluation officer at the World Bank He has published extensively on development management and knowledge Robert Picciotto is director general of Operations Evaluation at the World Bank

International Development Studies

Andrew Sumner, Michael A Tribe, 2008-04-11 A sure footed and self confident book ambitious in scope authoritative in execution and practical in its implications Simon Maxwell Director Overseas Development Institute London At last a development studies text that encourages self reflection from within the discipline Highly recommended Professor Ray Kiely Chair in International Politics Queen Mary University of London This is the book that academics development researchers and practitioners have been seeking for a long time It addresses the most important issues which development researchers and practitioners cope with each and every day Dr Tran Tuan Director Research and Training Centre for Community Development Hanoi Vietnam An insightful book for both development practitioners and researchers alike Professor K N Nair Director Centre for Development Studies Kerala India This book is about working professionally in Development Studies as a student researcher or practitioner It introduces and addresses the fundamental questions that everyone engaged with development must ask What is development and why do we wish to study it How do the many theoretical methodological and epistemological approaches relate to research and practical studies in development How are development research and practice linked Accessibly written with extensive use of case study material this book is an essential primer for students of development studies who require a concise penetrating overview of its foundations It is also core reading for students and practitioners concerned with the design of studies in the course of policy analysis sector reviews or project formulation management and evaluation

International Development Governance Ahmed Shafiqul Huque, Habib Zafarullah, 2017-09-25 The establishment of good governance is a major challenge for the developing world along with the need to sustain the progress resulting from developmental efforts Although there are numerous studies on the development and governance of emerging nations few volumes make a serious effort to bring together these two critical concepts International Development

Governance combines the two concepts development and governance by examining the issues and problems faced by nations in their attempts to establish sustainable governance This textbook also initiates discussions on the concept of development governance in an international context The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge Their views explain the issues and problems with reference to a number of tools that could establish development governance and sustain it The text offers in depth examinations of developmental sectors resulting in a textbook that will inspire future public officials policy makers and consultants to contribute to the betterment of life for citizens of developing countries

Environmental Assessment in Developing and Transitional Countries Norman Lee, Clive George, 2013-06-10 Since the 1980s and especially since the Rio Earth Summit in 1992 there has been a substantial extension in the adoption and use of Environmental Assessment EA procedures in developing countries and countries in transition low and middle income countries However few existing texts in environmental assessment or development studies have reflected this trend sufficiently until this publication Divided into two main parts EA Principles Processes and Practice Country and Institutional Studies of EA Procedures and Practice This book explains the essentials of environmental impact association in the context of developing countries and assesses its importance to both developed and developing countries

International Community Psychology Stephanie Reich, Manuel Riemer, Isaac Prilleltensky, Maritza Montero, 2007-07-03 Community psychology CP has a rich history and presence internationally that many people may not be aware of Today s increasingly global environment encourages reviewing the world wide goals and practices of CP The desire to promote collective well being clearly transcends geographical boundaries The goal of developing a global perspective and discourse between countries has been delayed by the lack of a single accessible source for information This book provides the first in depth guide to global community psychology research and practice history and development theories and innovations presented in one field defining volume Included are contributions from countries with long histories of oppression social movements and political turmoil long time democracies and former dictatorships Fully formed CP establishments compare with fledgling ventures into the field The contributors document the complex relationships between CP and ideological currents other strands of psychology and social science cultural and historical traditions and economic developments The goals of this book are several Promote international collaboration enhance theory utilization and development identify biases and barriers in the field accrue critical mass for a discipline that is often marginalized minimize the pervasive US centric view of the field Practitioners and researchers will find in International Community Psychology new perspectives on the communities they serve As a text for advanced and graduate level courses it depicts a robust field with a legitimate mission When concepts of community and sometimes even of psychology may not always translate from one nation to the next this book provides a world of needed context

Environments and Livelihoods Koos Neefjes, 2000 This book is intended to be used to support the campaigning

and lobbying work of local and international development organizations to improve the formulation and implementation of development strategies and to strengthen participatory project planning monitoring and impact assessment in poverty and environmental change
