Rotorcraft Certification by Simulation and Analysis Gareth D. Padfield, Stefan van 't Hoff, Philipp Hofmeister, Linghai Lu, Mark White, Giuseppe Quaranta, 2025-05-15 This open access book presents the steps necessary for the application of rotorcraft flight modelling and simulation and analysis in support of certification for compliance with EASA CS 27 and CS 29 SUBPART B FLIGHT and other flight related rules e.g CS 27.9 Appendix B Airworthiness Criteria for Helicopter Instrument Flight The material is presented in the form of a structured Rotorcraft Certification by Simulation process starting from the relevant paragraphs in the Certification Specifications through a comprehensive description of the assembly of flight simulation requirements informed by judgements on Influence Predictability and Credibility and on into the detailed building of the three major elements of the process the Flight Simulation Model the Flight Simulator and the associated Flight Test Measurement System The latter feeds both the flight model and simulator development with real world test data to support validation and fidelity assessment The book is intended

to provide support to early adopters of simulation and analysis in the certification process including those who have considerable experience and expertise in the use of Modelling and Simulation in support of design and development It is acknowledged that there exists much good practice in the rotorcraft industry in this regard However what is presented herein is considered a significant step forward in the development of this practice particularly in terms of the importance of a structured requirements based process using adaptable fidelity descriptive and predictive simulation tools and associated pre certification flight testing to reach the goal of a credible flight simulation **A Short Trekker , Monthly Catalog of**
