

## Transmission

9. Slide the gear change shaft out of the crankcase, collecting the gear change actuator arm and detent spring at the same time.

10. Insert a soft-faced implement through the selector drum to prevent it from turning, and then undo the screw securing the detent wheel to the selector drum.

11. Release the small screw securing the selector drum, bearing and keeper plate to the crankcase.

12. Pull/push the selector drum out and in to dislodge the bearing, then remove the drum from the crankcase.  
13. To remove the actuator shaft, slide it inwards and recover it from inside the crankcase.

### Note:

- It is not normally necessary to remove the inner selector drum bearing, though it is possible to do so by drifting from behind its recess in the crankcase.
14. If necessary, remove the spring abutment bolt.
