Treating Young Veterans Promoting Resilience Through Practice And Advocacy:

Treating Young Veterans Diann Kelly, Sydney Barksdale, David Gitelson, 2011-04-22 The editors of *Treating Young Veterans* and the authors of the individual chapters provide practitioners with essential information about the needs, desires, and possibilities for veterans and their families. This book represents a thoughtful, sensitive, and sensible approach to working with military personnel and veterans who have been deployed to wars in the Persian Gulf, Iraq, and Afghanistan. From the Foreword by Peter B. Vaughan, Dean, Graduate School of Social Service, Fordham University, New York, NY: Many veterans unsuccessfully attempt to self-manage their mental and physical health needs. This volume examines the multiple challenges awaiting the new generation of young veterans returning to civilian life and provides strategies for mental health professionals to assist them in the process of readjustment. It incorporates multidisciplinary state-of-the-art research to present practice and advocacy opportunities that facilitate a healthy and socially engaged reintegration into society for both traditional veterans (enlisted and career military personnel) and nontraditional veterans (reservists, national guardsmen, and women aged 18 to 40 years). The volume is divided into three sections: Assessment and Practice Approaches to Promote Resilience, Outreach and Practice With Special Communities, and Advocacy Practice to Promote Young Veterans' Well-Being. Each section includes an introduction highlighting the chapters and an epilogue delineating important steps in practice, outreach, and advocacy. Key Features: Targets the specific needs of veterans of the Iraqi and Afghan conflicts; Includes chapters on women and sexual trauma in the military and homeless combat veterans; Addresses the special needs of children of veterans and the nature of ambiguous loss as veteran by proxy; Employment issues and equity issues related to reservists. Authored by recognized experts including military officers, attorneys, and Veterans Affairs administrators. Designed for both general and scholarly readers.

Social Workers' Desk Reference, 2015-04-20 People all over the world are confronted by issues such as poverty, a lack of access to quality education, unaffordable and/or inadequate housing, and a lack of needed health and mental services on a daily basis. Due to these issues, there is a need for social workers who have access to relevant and timely scholarly materials in order to meet the needs of those facing these issues. The social, psychological, and biological factors resulting from these issues determine the level of a person's mental health at any given point in time, and it is necessary for social workers to continue to evolve and develop to the new faces and challenges of the times in order to adequately understand the effects of these issues. In the first and second editions of the *Social Workers' Desk Reference*, the changes that were occurring in social work practice, education, and research were highlighted and focused upon. This third edition continues in the same tradition and continues to respond to the changes occurring in society and how they are impacting the education, research, and practice of social work as a whole. With 159 chapters collaboratively written by luminaries in the profession, this third edition serves as a comprehensive guide to social work practice by providing the most recent conceptual knowledge and empirical evidence to aid in the understanding of the rapidly changing field of social work.

Each chapter is short and contains practical information in addition to websites and updated references Social work practitioners educators students and other allied professionals can utilize the Social Workers Desk Reference to gain interdisciplinary and interprofessional education practice and research

Cultivating Professional Resilience in Direct

Practice Jason M. Newell, 2017-09-26 Overwhelming empirical evidence indicates that new social workers particularly those going into child welfare or other trauma related care will discover emotional challenges including the indirect or secondary effects of the trauma work itself professional burnout and compassion fatigue However the newly revised CSWE Educational Policy and Accreditation Standards EPAS does not mandate the inclusion of content related to self care in social work curriculum or field education In a textbook that bridges the gap between theoretical and pragmatic approaches to this important issue in human service work Jason M Newell provides a potential resolution by conceptualizing self care as an ongoing and holistic set of practice behaviors described as the key to professional resilience To address the effects of trauma related care on direct practitioners Newell provides a comprehensive competency based model for professional resilience examining four key constructs stress empathy resilience and self care from a range of theoretical dimensions For those who work with vulnerable populations the tendency to frame self care solely within organizational context overlooks the importance of self care in domains beyond the agency setting Alternatively he uses a framework grounded in the ecological systems perspective conceptualizing self care as a broader set of practice behaviors pertaining to the whole person including the physical interpersonal organizational familial and spiritual domains of the psychosocial self Alongside professional self care practices at the organizational level Newell makes a case for the pragmatic role of recreational activities time with family and friends physical health spirituality and mindfulness The application of a comprehensive approach to self care practice has potential to empower practitioners to remain resilient and committed to the values mission and spirit of the social work profession in the face of trauma

Contemporary Military Reserves Eyal Ben-Ari, Vincent

Connelly, 2022-12-30 This book offers a comparative study of military reserves in contemporary democracies A combination of budgetary pressures new missions and emerging military roles during the past three decades has led the armed forces of democracies to rethink the training and use of reserve forces Moreover reservists have become central to the armed forces as part of moves towards total or comprehensive defense Despite this a scholarly bias towards studying regulars and conscripts means that reservists and reserve soldiers continue to receive only marginal attention This volume fills that lacuna through a series of country studies examining how best to understand the peculiarities of reservist service In contrast to regulars and conscripts reservists are marked by their dual management of civilian and military careers different family dynamics diverse motivations and commitment to the armed forces the material and non material incentives they are offered and their place in the political sphere This volume suggests two frames to make sense of such differences first it looks at reservists as transmigrants traveling between the military and civilian worlds and second it analyzes the multiple informal contracts and negotiations that bind them to the military All the chapters adopt these conceptualizations granting the volume a common focus and integrative frame The volume will be of much interest to students of military and strategic studies civil military relations sociology and International Relations
