Discrete and Computational Geometry and Graphs Jin Akiyama, Hiro Ito, Toshinori Sakai, Yushi Uno, 2016-11-24 This book constitutes the thoroughly refereed post conference proceedings of the 18th Japanese Conference on Discrete and Computational Geometry and Graphs JDCDGG 2015 held in Kyoto Japan in September 2015 The total of 25 papers included in this volume was carefully reviewed and selected from 64 submissions The papers feature advances made in the field of computational geometry and focus on

emerging technologies new methodology and applications graph theory and dynamics This proceedings are dedicated to Naoki Katoh on the occasion of his retirement from Kyoto University Convexity from the Geometric Point of View Vitor Balestro, Horst Martini, Ralph Teixeira, 2024-07-14 This text gives a comprehensive introduction to the common core of convex geometry Basic concepts and tools which are present in all branches of that field are presented with a highly didactic approach Mainly directed to graduate and advanced undergraduates the book is self contained in such a way that it can be read by anyone who has standard undergraduate knowledge of analysis and of linear algebra Additionally it can be used as a single reference for a complete introduction to convex geometry and the content coverage is sufficiently broad that the reader may gain a glimpse of the entire breadth of the field and various subfields The book is suitable as a primary text for courses in convex geometry and also in discrete geometry including polytopes It is also appropriate for survey type courses in Banach space theory convex analysis differential geometry and applications of measure theory Solutions to all exercises are available to instructors who adopt the text for coursework Most chapters use the same structure with the first part presenting theory and the next containing a healthy range of exercises Some of the exercises may even be considered as short introductions to ideas which are not covered in the theory portion Each chapter has a notes section offering a rich narrative to accompany the theory illuminating the development of ideas and providing overviews to the literature concerning the covered topics In most cases these notes bring the reader to the research front The text includes many figures that illustrate concepts and some parts of the proofs enabling the reader to have a better understanding of the geometric meaning of the ideas An appendix containing basic and geometric measure theory collects useful information for convex geometers 0000000000 00 0, 2020-01-25 1 000 1 2 3 4 5 *Polyhedra* Peter R. Cromwell, 1997 Polyhedra have cropped up in many different guises throughout recorded history In modern times polyhedra and their symmetries have been cast in a new light by combinatorics and group theory This book comprehensively documents the many and varied ways that polyhedra have come to the fore throughout the development of mathematics The author strikes a balance between covering the historical development of the theory surrounding polyhedra and presenting a rigorous treatment of the mathematics involved It is attractively illustrated with dozens of diagrams to illustrate ideas that might otherwise prove difficult to grasp Historians of mathematics as well as those more interested in the mathematics itself will find this unique book fascinating

An Adventure in Multidimensional Space Koji Miyazaki, 1986 This lavishly illustrated volume provides a strikingly visual approach to geometric shapes and transformations in 2 3 and 4 dimensional space Invoking Plato's polygons Kepler's polyhedra and Fuller's polytopes the author presents by means of hundreds of beautiful illustrations 100 of them in full color many complex designs which may be found in nature or which may be produced by computer graphics programs This self contained work reveals how polygons polyhedra and polytopes are effective tools or hieroglyphs with which we may investigate and describe the macro medio and micro worlds or the multi dimensional world without any telescope or
