

Graphs of Trigonometric Functions

You need to be able to recognise the graphs of $\sin\theta$, $\cos\theta$ and $\tan\theta$

You will have seen all these graphs on your GCSE

The key points to remember are the peaks/troughs of each, and the points of intersection

The Cos graph is the same as the Sin graph, but shifted along (it starts at 1 instead of 0)

The Tan graph has lines called asymptotes. These are points the graph approaches but never reaches (90° , 270° etc...)

Period (length of wave) = 360° for Sin and Cos, and 180° for Tan
