Karson, Deborah S. Kelley, Daniel J. Fornari, Michael R. Perfit, Timothy M. Shank, 2015-04-23 The deep oceans and global seafloor are truly Earth s last frontier They remain largely unexplored yet are critical to our survival on this planet This magnificent full color volume transports you to bizarre landscapes hosting exotic life forms that rival the most imaginative science fiction Starting with a historical summary of seafloor exploration and the developing technologies used to study this extreme environment it then describes the distinctive geologic components of the Earth s ocean floor and the unusual biological communities found along the mid ocean ridges This is an indispensable reference for researchers teachers and students of marine science and a visually stunning resource that will enlighten and intrigue oceanographers and enthusiasts alike A suite of online resources including photographs and video clips combine with the book to provide fascinating insights into the hidden world of seafloor geology and biology using the latest deep sea imaging and geological concepts **Towards Rethinking Politics, Policy and Polity in the Anthropocene** Hans Günter Brauch, 2025-02-24 Humankind faces two anthropogenic threats to its survival that are closely linked The first is the end of the Holocene and the start of the Anthropocene which was marked by the test of a nuclear bomb on 16 July 1945 In the prevailing peace and security narrative nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind s survival In the Anthropocene narrative we are the threat through our way of life and the burning of fossil fuels The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions Three stages of this order are distinguished the Cold War bipolarity the post Cold War era unipolarity and the end of the rule based global liberal order multipolarity on 24 February 2022 In this book ten multidisciplinary perspectives discuss complexity Anthropocene geopolitics peace and security discourses and the debate on

the Anthropocene planetary boundaries complex crises and integrative geography in the Anthropocene governance and politics and the Patriocene and gender Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis an extreme weather event impacting on Acapulco in Mexico on 25 October 2023 The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the international order In the security and peace narrative the other and nuclear weapons pose an existential threat in the Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication **Ullmann's Energy** Wiley-VCH,2015-06-02 Mit einer Sammlung der wichtigsten Artikel aus ULLMANN's Encyclopedia of Industrial Chemistry bietet dieses dreibändige Handbuch unzählige Informationen zu Energieressourcen und Technologien Dabei werden erneuerbare und auch fossile Energieträger gleichermaßen behandelt **Now Is Not the Time** Brett Bowden,2024-11-26 Human beings have an overwhelming tendency to overemphasize the significance of the present without considering context or historical perspective For many here and now is as good as it gets we have steadily progressed from a savage past and all we have to look forward to is the great unknown But if our literature and cinema are anything to go by many are convinced that the future will indeed be dystopian At the same time arguments abound that living in the moment is a key to happiness and success However to privilege the present over the past or future Brett Bowden argues is to engage in tempocentrism More than a mere preoccupation with the present tempocentrism involves comparing and judging the past in relation to the present with the tendency to assume that the present isn't only materially and qualitatively different from the past but also superior to it often morally so Yet tempocentrism a mistaken belief in the unprecedented nature of events going on around us brings with it a skewed perspective loaded with bias and prejudice Requiring just as much ignorance and arrogance as Eurocentrism tempocentrism implies that the present is somehow superior to the past because we live in it now The point however is not to suggest that there is not something special about the present there might well be but now is not the time to decide whether it is more significant than previous moments or those still to come Depending on the issue or event in question the time for that is later possibly hundreds or thousands of years later *Centennial Articles* Robert D.
