The Organic School of the Russian Avant-Garde Professor Isabel Wünsche, 2015-10-28 The artists of the Organic School of the Russian avant garde found inspiration as well as a model for artistic growth in the creative principles of nature Isabel Wünsche analyzes the artistic influences intellectual foundations and scientific publications that shaped the formation of these artists Particular emphasis is given to the holistic worldviews and organic approaches prevalent among artists of the pre revolutionary avant garde and the emergence of the concept of Organic Culture

The Icon and the Square Maria Taroutina, 2018-11-26 In *The Icon and the Square* Maria Taroutina examines how the traditional interests of institutions such as the crown the church and the Imperial Academy of Arts temporarily aligned with the radical leftist and revolutionary avant garde at the turn of the twentieth century through a shared interest in the Byzantine past offering a counternarrative to prevailing notions of Russian modernism Focusing on the works of four different artists Mikhail Vrubel Vasily Kandinsky Kazimir Malevich and Vladimir Tatlin Taroutina shows how engagement with medieval pictorial traditions drove each artist to transform his own practice pushing beyond the established boundaries of his respective artistic and intellectual milieu She also contextualizes and complements her study of the work of these artists with an examination of the activities of a number of important cultural associations and institutions over the course of several decades As a result *The Icon and the Square* gives a more complete picture of Russian modernism one that attends to the dialogue between generations of artists curators collectors critics and theorists *The Icon and the Square* retrieves a neglected but vital history that was deliberately suppressed by the atheist Soviet regime and subsequently ignored in favor of the secular formalism of mainstream modernist criticism Taroutina's timely study which coincides with the centennial reassessments of Russian and Soviet modernism is sure to invigorate

conversation among scholars of art history modernism and Russian culture *Ruins of Modernity* Julia Hell, Andreas Schönle, 2010-03-19 This interdisciplinary work uses the concept of the ruin as an approach to the study of modernity asking whether there is an intrinsic logic of ruin at work in modernity Architecture of the Off-Modern Svetlana Boym, 2008-07-04 This is an imaginative tour through the history and afterlife of Vladimir Tatlin's legendary but unbuilt Monument to the Third International of 1920 Boym traces the vicissitudes of Tatlin's Tower from its reception in the 1920s to its privileged recall in the reservoir of unofficial utopian dreams of the Soviet era **Babel in Russian and Other Literatures and Topographies** Martin Meisel, 2019-08-15 This study analyzes the biblical Tower of Babel story a cautionary tale that accounts for the diversity of languages and peoples in Russian literature and other topographies The author pursues its linking of language architecture and society as well as its relevance in art and literature over centuries To come to terms with a perceived disorder in the realm of language alternative explanations and projects for remediation abound The disorder and diversity themselves find expression in art literature and philosophical reflection and caused the emergence of a historical linguistics The ambition of the builders with its social and organizational premise reemerges in both political and material form as cities states and monumental constructions Utopian aspirations and linguistic claims permeate both revolutionary notions of universality and the romantic essentialism of the nation state These in turn provoke dystopian critique in literature and film As Martin Meisel reveals in this study the wrestle with language in its recalcitrant instability and imperfect social function enters into dialogue with the celebration of its diversity elasticity and creativity Machine Art in the Twentieth Century Andreas Broeckmann, 2016-12-16 An investigation of artists engagement with technical systems tracing art historical lineages that connect works of different periods Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems In this book Andreas Broeckmann examines a variety of twentieth and early twenty first century artworks that articulate people's relationships with machines In the course of his investigation Broeckmann traces historical lineages that connect art of different periods looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant garde artists in the 1910s and 1920s An art historical perspective he argues might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century old artistic exploration Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology algorithms and machine autonomy looking in particular at the work of the Canadian artist David Rokeby vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology which has brought with it a rethinking of human subjectivity He examines a range of artworks including those by the Japanese artist

Seiko Mikami whose work exemplifies the shift *Vladimir Tatlin. Retrospective* Anatoli Strigaliyov, 1993 Revoliutsiia! Demonstratsiia! Matthew S.
