THE SCRAMBLE FOR AFRICA AND THE BUILD UP TO A THIRD WORLD WAR: CHANGING POWER PATTERNS AT THE GLOBAL LEVEL AND LESSONS FOR AFRICA

Abstract

The aim of this journal was to analyze the current global war events and how they are set to change power patterns at the global level and its impact and lessons for Africa. The assumption of this study was that these reckless wars in the 21st century are set to reshape the global world order and lead to either African renaissance or recolonisation. The objectives of the study were, to account for the global hostilities, to project possible outcomes, and to come up with a solution to the identified challenges. The study relied on both primary and secondary data sets. The findings of the study were that, that the US Dollar will cease to be a global currency and that there is going to be a new alternative international payment system, the UNSC will die and the five permanent member states principle dies vindicating Mugabeism, that Russia will rely on nuclear threats for its survival, the trade war between China and USA has put China at the center of the USA's countervailing strategies, that part of the USA's countervailing strategy is targeting the BRICS (Brazil, Russia, India, China, and South Africa), that the USA and Russia despite their own differences are uncomfortable with the sudden surge of China as this threatens the historical racial hierarchy that has been dominated by whites, that China has been burdened with externally orchestrated convulsions in Hong Kong, arms sales to Taiwan, Tibet cessation led Daila Lama, alleged human rights against the minority Muslims in North-West China, and bellicose statements targeting China's intentions within its region, and that Afrophobia marks the end of regional African bodies especially SADC and revolutionary parties. The poor performance of the South African economy (29 percent unemployment rate) is a dangling sword in the hands of the white business sector. The study recommends that South Africa must kill the tribe as prescribed by Samora Machael who stated that for a nation-state to live the tribe must die, the USA must avoid the Hitler approach of creating so many wars, Africa must not jump to award resources to the foreigners, Africa must ringfence its resources from external exploitation, there will be more coups in Africa as the level of disgruntlement has risen alarmingly and Africa must not just 'hope' as a strategy for survival.

Introduction

Sherman Kent the godfather of strategic intelligence states that powerful countries use strategic intelligence to shape and control the future. The countries are investing in technology, intelligence acquisition, and analysis to improve reliability and the credibility of the intelligence gathered. This has seen countries invest in digital intelligence, artificial intelligence, and geo-information surveys to predict and control future events. The 5th generation of technology has seen developed countries moving towards digital security and technology shaping global events. Unfortunately, in Africa,

War And The Changing Global System:

War and the Changing Global System William Kinkade Domke,1988-01-01 **The Changing Global Order** Madeleine O. Hosli,Joren Selleslags,2019-11-22 This volume offers a comprehensive evaluation of the concept of global order with a particular emphasis on the role of regional organisations within global governance institutions such as the United Nations Building from a solid theoretical base it draws upon the expertise of numerous leading international scholars offering a broad array of timely and relevant case studies These all take into consideration the historical setting before analysing the contemporary situation and offering suggestions for potential realignments and readjustments that may be witnessed in the future The volume adopts an interdisciplinary approach when addressing some of the most pressing issues of global governance which our global community must tackle This presents the readers an opportunity to understand related topics such as political economy international law institutions of global governance in conjunction with the academic field of International Relations IR It further helps students and interested readers understand the theoretical and practical foundations to the changing nature of global affairs *International Relations In A Changing Global System* Seyom Brown,2018-02-19 This book expands and deepens the analysis of a new approach to the study of international relations in a changing global system elaborating the essential characteristics of the anarchic structure of the world polity **The Palgrave Handbook of Africa and the Changing Global Order** Samuel Ojo Oloruntoba,Toyin Falola,2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa s relations with the world **Ghana** Kwame Boafo-Arthur,2013-07-04 Ghana has witnessed a revolution through the ballot box since its return to constitutional rule in 1993 Yet this period of sustained democratic government in an era of globalization and liberal triumphalism has brought with it new demands How has Ghana faced up to the problems of institution building state market relations and democratic leadership Can it deal with the challenges posed by security human rights and foreign policy in the twenty first century This unique collection interrogates all these issues and assesses the future of the democratic experiment in one of sub Saharan Africa s rare islands of peace In doing so it provides an invaluable guide to Ghana s political past present and future **Environment and Planning** ,1990 Late Modernity Margaret S. Archer,2014-03-10 This volume examines the reasons for intensified social change after 1980 a peaceful process of a magnitude that is historically unprecedented It

examines the kinds of novelty that have come about through morphogenesis and the elements of stability that remain because of morphostasis. It is argued that this pattern cannot be explained simply by acceleration. Instead, we must specify the generative mechanisms involved that underlie and unify ordinary people's experiences of different disjunctions in their lives. The book discusses the umbrella concept of social morphogenesis and the possibility of transition to a Morphogenic Society. It examines possible generative mechanisms accounting for the effects of social morphogenesis in transforming previous and much more stable practices. Finally, it seeks to answer the question of what is required in order to justify the claim that Morphogenic society can supersede modernity. **Transafrica Forum**, 1996 **A Changing Global Order**, 2007

Political Economy and the Changing Global Order Richard Stubbs, Geoffrey R. D. Underhill, 2006. Covering the basics necessary for a course in international political economy (IPE), this text comes from a non-American critical perspective and the contributors are drawn from prominent scholars of IPE around the world. **Systemic Transitions** William R. Thompson, 2009-02-13. When do systemic transitions occur? In periods in which the pre-eminence of one state gives way to another? What makes them probable? Do they or must they always take the same form? This book answers these questions.

The China Syndrome Harsh V. Pant, 2010-11-10. As the balance of power shifts from the West to the East, the relationship between the two regional giants, China and India, gains significance. Their relationship will determine to a great extent the new political architecture that takes shape in Asia and the world at large. Nor are the two powers unaware of this. As a Chinese premier meeting the Indian prime minister is reported to have said, "When we shake hands, the whole world will be watching." The China Syndrome seeks to decipher the complex, multi-layered relationship between the two countries and the strategy or lack of it in India's China policy. Given the emerging scenario, it is a subject of considerable interest.

Journal of Economic Literature, 1988. Politics and Change in the Middle East Roy Andersen, Robert F. Seibert, Jon G. Wagner, 2009. This edition presents an intensive update of facts, figures, and events. It contains extensive discussion of democracy and contains an abundance of visual aids and maps. **Orwell Colloquy "1984" Myths and Realities**, 1984.

Measuring Global Values Michael J. Sullivan, 1991-07-18. Measuring Global Values is a major book that represents an enormous research effort. The book enables careful and systematic comparisons over time and across space as to whether a society is improving or losing ground. It provides world order scholars with a fully elaborated framework for future research. Sullivan's book is certain to be the foundational work for future developments relating to normative assessment. Richard Falk, Princeton University. This volume profiles 162 countries using as a basis for comparison more than a hundred indicators measuring how each country reflects 5 global values: peace, economic well-being, ecological balance, social justice, and political participation. The use of data-based management software systems for the collection of information results in a broad-based analysis which yields thoroughly documented conclusions and affirms the five values as appropriate evaluative tools. Introductory material outlines the methods used in the study, defines the measurement criteria, and identifies the study's

objectives Each of the five subject areas is then addressed separately its findings supported by numerous tables and excerpts and its data supplemented by a bibliography at the end of each chapter Students of political science as well as global policy scholars will consider this unique application of current technology to the examination of global values a significant contribution to literature on the subject Globalization, War, and Peace in the Twenty-first Century William R. Nester, 2010-11-15 Violence is as old as humanity Organized violence or war is as old as the first organized societies Throughout history most states were either preparing for engaging in or recovering from war Yet recently the threat or use of violence in international relations known as geopolitics has sharply diminished as nearly all states are at peace all or most of the time Nonetheless geopolitical conflicts instigated by rogue states militant ideologies transnational terrorist groups revolutionary movements or voracious ruthless economic interests continue to plague countries and regions around the world Although each geopolitical conflict has unique causes underlying them all is some volatile mix of the best and worst of human nature Many a war has been fought under the lofty banner of justice freedom and equality Many more however are provoked by the far darker motives of greed aggression fear vengeance hatred and ignorance Globalization War and Peace in the Twenty first Century explores humanity s most persistent and tragic problem by answering five crucial questions How is military power created and asserted How do international laws and organizations constrain war Why do nations go to war or stay at peace What continuities and changes characterize recent warfare What are weapons of mass destruction and what is the likelihood of them being used What are the source methods and results of terrorism and counterterrorism The emphasis is on recent headlines with case studies on the war against Al Qaeda the Iraq War the Israeli Palestinian conflict attempts by North Korea and Iran to become nuclear powers and other ongoing tragedies and threats All along the book reveals why geopolitics persists even though the ever thickening web of interdependent relations among nation states and peoples known as globalization sharply raises war s costs and reduces its benefits **Global Politics** James Lee Ray, 1992 Ancillary package available upon adoption **Defense White Paper** , 1990 **Social Problems** Robert Dean Peterson, Delores F. Wunder, Harlan L. Mueller, 1999 For courses in Social Problems or Global Issues This volume integrates traditional sociological concepts and insights with an ecological awareness and applies it to the globalization process It takes a dynamic view of globalization as an evolutionary process with a potential for unprecedented transformation of social structure and consciousness
