Engaging Students in Academic Literacies María Estela Brisk,2014-07-25 The Common Core State Standards require schools to include writing in a variety of genres across the disciplines Engaging Students in Academic Literacies provides specific information to plan and carry out genre based writing instruction in English for K 5 students within various content areas Informed by systemic functional linguistics a theory of language IN USE in particular ways for particular audiences and social purposes it guides teachers in developing students

ability to construct texts using structural and linguistic features of the written language This approach to teaching writing and academic language is effective in addressing the persistent achievement gap between ELLs and mainstream students especially in the context of current reforms in the U S Transforming systemic functional linguistics and genre theory into concrete classroom tools for designing implementing and reflecting on instruction and providing essential scaffolding for teachers to build their own knowledge of its essential elements applied to teaching the text includes strategies for apprenticing students to writing in all genres features of elementary students writing and examples of practice Our Changing Planet ,2002 NOAA's Climate Observations and Services ,2001 **Hydrologic Science Priorities for the U.S. Global Change Research Program** National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee on Hydrologic Science,1999-12-04 The availability of fresh water is potentially one of the most pervasive crises of the coming century Water related decisions will determine the future of major ecosystems the health of regional economies and the political stability of nations A vigorous program of research in hydrologic sciences can provide the basis for sound water management at local regional national and international levels The Committee on Hydrologic Science was established by the National Research Council in 1999 to identify priorities for hydrologic science that will ensure its vitality as a scientific discipline in service of societal needs This charge will be performed principally through a series of studies that provide scientific advice on the hydrologic aspects of national program and U S hydrologic contributions to international programs This first report contains a preliminary assessment of the hydrologic science content of the U S Global Change Research Program USGCRP Because this is a short and focused report little effort is spent to reaffirm the established and successful elements of the USGCRP In fact the Committee generally endorses the findings of the National Research Council NRC report Global Environmental Change Research Pathways for the Next Decade NRC 1998a the so called Pathways report in this respect Instead the attention here is directed toward the most critical missing hydrologic science elements in the FY2000 USGCRP This brings the focus to the terrestrial component of the water cycle The integrative nature of terrestrial hydrology could significantly strengthen the USGCRP New Trends in Earth-Science Outreach and Engagement Jeanette L. Drake,Yekaterina Y. Kontar,Gwynne S. Rife,2013-12-11 Perhaps just as perplexing as the biggest issues at the core of Earth science is the nature of communicating about nature itself New Trends in Earth Science Outreach and Engagement The Nature of Communication examines the processes of communication necessary in bridging the chasm between climate change and natural hazard knowledge and public opinion and policy At this junction of science and society 17 chapters take a proactive and prescriptive approach to communicating with the public the media and policy makers about the importance of Earth science in everyday life Book chapters come from some 40 authors who are geophysical scientists social scientists educators scholars and professionals in the field Bringing diverse perspectives these authors hail from universities and research institutes government agencies non profit associations and

corporations They represent multiple disciplines including geosciences education climate science education environmental communication and public policy They come from across the United States and around the world Arranged into five sections the book looks at geosciences communication in terms of 1 Education 2 Risk management 3 Public discourse 4 Engaging the public 5 New media From case studies and best practices to field work and innovations experts deliver pragmatic solutions and delve into significant theories including diffusion argumentation and constructivism to name a few Intended for environmental professionals researchers and educators in the geophysical and social sciences the book emphasizes communication principles and practices within an up to the minute context of new environmental issues new technologies and a new focus on resiliency
