Residues of Pesticides and Other Contaminants in the Total Environment Francis A. Gunther, 2012-12-06 Worldwide concern in scientific industrial and governmental communities over traces of toxic chemicals in foodstuffs and in both abiotic and biotic environments has justified the present triumvirate of specialized publications in this field comprehensive reviews rapidly published progress reports and archival documentations These three publications are integrated and scheduled to provide in international communication the coherency essential for nonduplicative and current progress in a field as dynamic and complex as environmental contamination and toxicology Until now there has been no journal or other publication series reserved exclusively for the diversified literature on toxic chemicals in our foods our feeds our geographical surroundings our domestic animals our wild life and ourselves Around the world immense efforts and

many talents have been mobilized to technical and other evaluations of nature's local magnitudes, fates, and toxicology of the persisting residues of these chemicals loosed upon the world.
