Water Resources Foundations Of Contemporary Environmental Studies Series:

Water Resources Shimon C. Anisfeld, 2011-01-03 In this concise introduction to water resources Shimon Anisfeld explores the fundamental interactions between humans and water including drinking sanitation irrigation and power production The book familiarizes students with the current water crisis and with approaches for managing this essential resource more effectively in a time of rapid environmental and social change Anisfeld addresses both human and ecological problems including scarcity pollution disease flooding conflicts over water and degradation of aquatic ecosystems For inquiring students of any level *Water Resources* provides a comprehensive one volume guide to a complex but vital field of study

An Introduction to Scientific Research Methods in Geography and Environmental Studies Daniel Montello, Paul Sutton, 2012-12-10 Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation From chapters on the scientific method and fundamental research concepts to experimental design sampling and statistical analysis the text offers an excellent introduction to the key concepts of geographical research The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters Joseph Mallalieu School of Geography Leeds University Montello and Sutton is one of the best texts I've used in seminars on research methodology The text offers a clear balance of quantitative vs qualitative and physical vs human which I've found particularly valuable The chapters on research ethics scientific communication information technologies and data visualization are excellent Kenneth E Foote Department of Geography University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research covering both geography and environmental studies Written for undergraduate and postgraduate students it Explains both the conceptual and the technical aspects of research as well as all phases of the research process Combines approaches in physical geography and environmental science human geography and human environment relations and geographic and environmental information techniques such as GIS cartography and remote sensing Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography environmental studies and related disciplines such as planning and earth science *Energy Research Abstracts*, 1990 [Resources in Education](#), 1988

National Library of Medicine Current Catalog National Library of Medicine (U.S.), [Selected Water Resources Abstracts](#), 1991 [Current Catalog](#) National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965-70 **Pesticides in Surface Waters** Steven J. Larson, Paul D. Capel, Michael Majewski, 2019-04-24 Pesticide use in agriculture and non agriculture settings has increased dramatically over the last several decades Concern about adverse effects on the environment and human health has spurred an enormous amount of research into their environmental behavior

and fate Pesticides in Surface Waters presents a comprehensive summary of this research

GIS and Environmental Modeling Michael F. Goodchild,Louis T.

Steyaert,Bradley O. Parks,Carol Johnston,David Maidment,Michael Crane,Sandi Glendinning,1996-09-30 GIS and Environmental Modeling Progress and Research Issues Michael F Goodchild Louis T Steyaert Bradley O Parks Carol Johnston David Maidment Michael Crane and Sandi Glendinning Editors With growing pressure on natural resources and landscapes

there is an increasing need to predict the consequences of any changes to the environment Modelling plays an important role in this by helping our understanding of the environment and by forecasting likely impacts In recent years moves have been made to link models to Geographical Information Systems to provide a means of analysing changes over an area as well as over time GIS and Environmental Modeling explores the progress made to date in integrating these two software systems Approaches to the subject are made from theoretical technical as well as data stand points The existing capabilities of current systems are described along with important issues of data availability accuracy and error Various case studies illustrate this and highlight the common concepts and issues that exist between researchers in different environmental fields The future needs and prospects for integrating GIS and environmental models are also explored with developments in both data handling and modelling discussed The book brings together the knowledge and experience of over 100 researchers from academic commercial and government backgrounds who work in a wide range of disciplines The themes followed in the text provide a fund of knowledge and guidance for those involved in environmental modelling and GIS The book is easily accessible for readers with a basic GIS knowledge and the ideas and results of the research are clearly illustrated with both colour and black and white graphics

Climate Change 2021 - The Physical Science Basis Intergovernmental Panel on Climate Change (IPCC),2023-07-26 The Working Group I contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the physical science basis of climate change It considers in situ and remote observations paleoclimate information understanding of climate drivers and physical chemical and biological processes and feedbacks global and regional climate modelling advances in methods of analyses and insights from climate services It assesses the current state of the climate human influence on climate in all regions future climate change including sea level rise global warming effects including extremes climate information for risk assessment and regional adaptation limiting climate change by reaching net zero carbon dioxide emissions and reducing other greenhouse gas emissions and benefits for air quality The report serves policymakers decision makers stakeholders and all interested parties with the latest policy relevant information on climate change Available as Open Access on Cambridge Core
