

Year 1	Western Adelaide Region - Maths Assessment Tasks Map (Draft – November 2013)					Pedagogical Goals	
Overview	The Australian Curriculum: Mathematics aims to ensure that students... are confident, creative users and communicators of mathematics, able to investigate, represent and interpret mathematical problems and work both within and across mathematics, develop an increasingly sophisticated understanding of mathematical concepts and fluency with processes, and are able to pose and solve problems and reason in Number and Algebra, Measurement and Geometry, and Statistics and Probability; recognise connections between the areas of mathematics and other disciplines and appreciate mathematics as an accessible and enjoyable discipline to study.					• Understanding • Fluency • Problem Solving • Reasoning	
Content Strands	Number & Algebra						
Sub Strands	Number & Place Value			Fractions and Decimals	Money and Financial Mathematics	Patterns & Algebra	
Big Idea 1 Concept Key Understanding	Counting the Count		Place Value	Addition & Multiplicative Thinking	Partitioning		
	Numbers are said in a particular order and there are patterns in the way we say them The teacher will model this using many or few rods A pattern exists where many tens make what I look like (ie. 10 sticks, 10 jumps, 10 units) We can recognise small collections without counting (jumping) Collections can be measured, compared and classified as more, less, equal to... or between 2 and 10 (smaller, different)	In place value we use units introduced in 10 ones is 1 ten, 10 tens is 1 hundred, ... In place value there are names for base ten units (multiples of 10) (ie. tens, hundreds, thousands)	Numbers can be named in terms of their parts (part part whole, 7 is 6 and 1, 8 is 4 and 4, 10 is 5 and 5, ...) Numbers have properties that help us work flexibly with them (eg. 7 is 5 and 2, 5 and 2 is 7, 7 plus 3 is 10) Visualisation and partitioning numbers is essential for mental and written computation	The number of parts names the part (ie. 2 parts = halves, 1 part = whole) True fractions have equal parts Language is important (ie. 7 plus 1 not 1 plus 7, halves, three halves – how many not how much)	Currency has defined values and can be recognised and sorted according to appearance and value The size of Australian coins and notes does not determine its value Each country has its own currency Currency provides access to food and services	A pattern requires an element of repetition that can be described and generalised with symbols and rules Patterns can be represented in many ways including using combinations of numbers, objects and symbols Patterns are all around us	
Assessment Curriculum Content Descriptor	Develop combinations with number sequences to and from 100 by ones from any starting point. Skip-count by 5s, 10s and 10s starting from zero	Recognise, model, read) write and order numbers to at least 100. Locate these numbers on a number line	Count collections to 100 by partitioning numbers using place value	Represent and solve simple addition and subtraction problems using a range of strategies including counting on, partitioning and measuring parts	Recognise and describe half as one of two equal parts of a whole	Recognise, describe and order Australian coins according to their value	Investigate and describe number patterns formed by skip counting and counting with objects
Exemplar Standard	Students describe number sequences resulting from skip counting by 2s, 5s and 10s	Students count to and from 100 and locate numbers on a number line	Students partition numbers using place value	Students carry out simple additions and subtractions using counting strategies	Students identify representations of one half	Students recognise Australian coins according to their value	Students describe simple patterns involving numbers and objects
Exemplar Assessment Task	1.1 Number Chains		1.2 Mystery Number	1.3 On the Bus			1.4 Lucy's Books
