Westworld:

Westworld Michael Chrichton, 2017-04 This is the original screenplay of Westworld as it was just two days before actual shooting began Before this there had been many cuts changes additions and deletions over a period of months Much can be learned about actual film making from reading this book It is to be suggested to read the Forward by Former Story Editor Saul David and the introduction by Michael Chrichton at least twice once before downloading and seeing the original film and then afterwards Now it is said Westworld was ahead of its time in depicting the dangers of computers and automated systems Now we can realize that when the robots start breaking down or malfunctioning that they are being hit with a programming bug or by a computer virus In this and many other respects this movie used new technology and did things that had never been done before The Medieval Queen who is a robot convinces the knight to fight a battle to the death with the Black Knight She tells the knight he will win the battle because the Black Knight cannot see well from his left eye It is a trap The left eye has been repaired by the Technicians So the knight thinking he is sure to win is killed in real life by the Black Knight
