E Durkheim

What Is Darwinism And Other Writings On Science And Religion:

What is Darwinism? Charles Hodge, 1994 *What is Darwinism?* CHARLES. HODGE, 2025-03-28 Explore the heated debates surrounding Darwin's theory of evolution with Charles Hodge's *What is Darwinism*. A seminal work in the discussion of science and theology, this book delves into the core tenets of Darwinism, particularly natural selection, and examines its implications for traditional creationism. Hodge, a prominent theologian, offers a detailed critique of evolutionary theory, engaging with the scientific concepts of his time. This volume provides invaluable insight into the historical context of the Darwinism debate and the complex relationship between science and religious belief. A key text for understanding the intellectual landscape of the 19th century, *What is Darwinism* remains relevant for anyone interested in the history of evolutionary thought, the ongoing dialogue between science and religion, and the philosophical underpinnings of modern biology. A meticulously prepared print republication of this classic work, this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America and possibly other nations. Within the United States, you may freely copy and distribute this work as no entity, individual or corporate, has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant.

Evangelicals and Science in Historical Perspective David N. Livingstone, Darryl G. Hart, Mark A. Noll, 1999. Comprising papers by such distinguished scholars as John Headley Brooke, James R. Moore, Ronald Numbers, and George Marsden, this collection shows that questions of science have been central to evangelical history in the United States as well as in Britain and Canada. *Who's who in Theology and Science*, 1996 *Theological Encyclopaedia and Methodology* George Richard Crooks, John Fletcher Hurst, Karl Rudolf Hagenbach, 1894 *A History of the Warfare of Science with Theology in Christendom* Andrew Dickson White, 1897 **Asian Religious Responses to Darwinism** C. Mackenzie Brown, 2020-12-17. This volume brings together diverse Asian religious perspectives to address critical issues in the encounter between tradition and modern western evolutionary thought. Such thought encompasses the biological theories of Charles Darwin, Jean Baptiste Lamarck, Earnest Haeckel, Thomas Huxley, and later neo-Darwinians, as well as the more sociological evolutionary theories of thinkers such as Herbert Spencer, Pyotr Kropotkin, and Henri Bergson. The essays in this volume cover responses from Hindu, Jain, Buddhist, Chinese, Japanese, and Indo-Tibetan, Confucian, Daoist, and Muslim traditions. These responses come from the decades immediately after publication of *The Origin of Species* up to the present, with attention being paid to earlier perspectives and teachings within a tradition that have affected responses to Darwinism and western evolutionary thought in general. The book focuses on three critical issues: the struggle for survival, the moral implications read into it, genetic variation, and its seeming randomness, as related to the problems of meaning and purpose and the nature of humankind and

human exceptionalism Each essay deals with one or more of the three issues within the context of a specific tradition
