Rosso, 2022-07-12 From climate change to fake news an entertaining and enlightening look at the widespread phenomenon of denial in our society Donald Trump won the election climate change isn't real America is a color blind country Despite overwhelming evidence to the contrary why do so many of us refuse to admit the truth In fact as Jared Del Rosso argues in this thought provoking book denial is so much a part of our lives that we deny its existence all the time even when this works against our best interest even when we are being choked by its very fumes Denial is one of those rare books that will change the way you think In a highly readable style that draws on examples from current events politics and pop culture Del Rosso teases out the complexities of denial from not noticing that someone has food stuck in their teeth to companies that engage in widespread fraud like Enron and Wells Fargo to the much larger scale denials of climate change or systemic racism Drawing on classic studies in the social sciences and his own research of the denial of torture Del Rosso builds a fascinating typology of the forms and meanings of denial exploring the behavior of those who refuse to acknowledge their actions and

what it means to live in a society where such lying fraud and corruption is commonplace In wide ranging examples Del Rosso explores the causes strategies and consequences of denial When scandal hits and accusations of misconduct are made he argues that individuals like Harvey Weinstein or Brett Kavanaugh or organizations like the Catholic Church or Penn State go through a series of moves to try to avoid accountability Del Rosso focuses on the individuals involved but also asks how could so many people not know what their priests or their coaches or their coworkers were doing Del Rosso effectively argues that recognizing what denial looks like is the crucial first step in mitigating its effects on us and society as a whole At a time when powerful people and institutions are increasingly being held accountable for their actions Denial provides an undeniable reality check
