The Ships of the Ancient Near East (c. 1000-500 B.C.) Marie-Christine de Graeve,1981

Ships and Seafaring in Ancient Times Lionel Casson,1994 Ever since the earliest travelers took to the water on reed rafts or inflated goatskins ships and boats have played a paramount role in the history of the Western world The invention of the sail about 3500 BC resulted in ever faster and more efficient water transport and the great civilizations of Egypt Greece and Rome depended on ships and seafarers for their prosperity This entertaining book by the world s foremost authority on ancient seamanship traces the development of the boat from the most primitive craft to the powerful warships of the Greeks the huge Roman merchant vessels and the slender galleys of the Vikings Professor Casson shows how the discoveries of marine archaeologists and recent experiments with full size replicas of ancient boats have increased our knowledge of the way in which ships were built and used Drawing upon written accounts and contemporary artistic depictions of naval battles trading expeditions and other voyages he brings the world of seafaring in ancient times vividly to life

Roman Warships Michael Pitassi,2011 An examination of Roman naval development drawing upon archaeological evidence documentary accounts and visual representation

Ancient Ships Cecil Torr,2020-01-31 First published in 1895 this vintage book contains a detailed history of ancient shipping Focusing on shipping in the Mediterranean between 1000 B C And 1000 A D this volume contains information on everything related to the subject including detailed descriptions of different ships how they were designed and made their evolution and much more Cecil Torr s Ancient Ships is highly recommended for those with an interest in maritime history and it would make for a fantastic addition to collections of allied literature Contents include Ships with Oars Dimensions of the Ships Tonnage of the Ships Materials for Ship building Structure of the Hull Anchors and Cables Steering gear Rigging Flags and Lights Sounding lead Log etc Ship s Boat etc

Greek Oared Ships 900-322 Bc John Morrison,1998-12 This fundamental work has been out of print for many years but it is now at last once again available It is written in the belief that a proper understanding of Greek civilization in antiquity requires some knowledge of its background of seafaring A knowledge of nautical practice is required for an understanding of some passages of Greek poetry and prose writing and for a correct interpretation of numerous historical events This is an attempt at a thorough study of the evidence both literary and archaeological Modern reference books tend to repeat the misconceptions of nineteenth century scholars In contrast Mr Morrison and Mr Williams have written a scholarly and scientific study of the subject They collect in this volume evidence for Greek oared ships between 900 and 322 BC The book is primarily a catalogue of decorated pottery and quotations from literature and from naval inventories The pottery is illustrated by diagrams and plates and the quotations are given in full

History of Warships James L. George,1999 Organised by the four major ages of warships galley sail steam and modern this book presents the design

evolution construction and operational uses of specific ship types including their defenses weapons and famous sea battles

The Roman Navy Michael Pitassi, 2012-05-11 The Roman Navy was remarkable for its size reach and longevity As significant as the Royal Navy was to the British Empire in the nineteenth century the Roman Navy was crucial to the extraordinary expansion of Imperial power and for its maintenance over a period of more than 800 years The fabric and organisation of this maritime force is at the core of this new book At the height of its power the Roman Navy was at least in numerical terms the largest maritime force ever to have existed It employed tens of thousands of sailors and maintained and fought fleets of ships larger than any forces since In these pages the author looks at all the aspects of the Navy in turn Shipbuilding rigs and fittings and shipboard weaponry are covered as are all the principal ship from the earliest types to the very last The command structure is outlined as are all aspects of the crews lives their recruitment terms of service training and uniforms Life onboard food and drink discipline religion and superstition are described while seamanship and navigation are dealt with along with bases and shore establishments Operations feature prominently the allied and enemy navies compared and specimen battles employed to explain fighting tactics All these aspects changed and developed hugely over the great span of the Roman empire but this fascinating book brings this complex story together in one brilliant volume
