Unpacking and Handling Procedures

WD hard drives are precision instruments and must be handled with care during unpacking and installation. Hard drives can be damaged by rough handling, shock and vibration, or electrostatic discharge (ESD). Be aware of the following precautions:

- Do not unpack your hard drive until you are ready to install it. Your hard drive is packaged in an anti-static bag.
- Handle the hard drive only by the sides. Avoid touching circuit board components on the bottom of the drive.
- To avoid ESD problems, ground yourself by touching the metal chassis of the computer or by wearing a grounding strap before handling the hard drive. Articles of clothing generate static electricity. Do not allow clothing to come in direct contact with the hard drive or circuit board components.
- Do not stack hard drives or stand your WVD drive on its edge.
- Do not drop, shake, or knock down the hard drive.
- Save the original packaging materials and antistatic bag in case you need to return your hard drive. Your warranty will be void if your returned drive is shipped in anything other than the original packaging or WD-approved materials.
