Whales Touching The Mystery:

Whales Erik D. Stoops, Jeffrey L. Martin, Debbie Lynne Stone, 2005 **Whales** Doug Thompson, 2006 Ever since his first contact with a gray whale as a teenager Doug Thompson has had a passion for this majestic marine mammal Here he shares stories of whales he has met over his 30 year career in particular the friendly Gray whales of San Ignacio Lagoon in Baja Mexico He describes the thrill of interacting with these gentle giants who seek out human contact within their birthing lagoons Weaving his own and others fascinating personal accounts with factual information he describes the hidden lives of whales their mysterious migrations and the modern threats they face in the world s waters He also chronicles the efforts of human champions who are working to end whale hunting and promote whale watching a far preferable economic alternative worldwide Ideal for seasoned whale watchers and the general interest reader this appealing package includes photos and maps as well as a first rate companion DVD

Dreams Beyond Time Lee Irwin, 2022-05-04 Dreams Beyond Time On Sacred Encounter and Spiritual Transformation offers readers an overview of dreams research as applied to non ordinary dreams Lee Irwin describes four basic types of dreaming normative mythic psychic and transpersonal and he illustrates each type with specific dream examples These types of dreaming are then used as a lens to look more closely at additional dream types that indicate dreaming as a process of creative discovery Through virtual dreaming encounters latent human potentials are revealed and suggest aspects for spiritual development based on dream recording interpretation and analysis In turn this leads to a metaphysical description that is pan sentient illustrating a vivid living universe of process becoming in which certain dream types reveal mythic psychic and transpersonal capacities as intrinsic to a deeper more awakened sense of intersubjective self awareness While dream theories from many diverse authors are explored the author uses an existential and phenomenological method to analyze dreaming contents in relationship to altered states of mind trance out of body and near death experience meditation imagination and stages of lucid self awareness Transpersonal dreams are given considerable attention in relationship to mystical traditions paranormal research and the comparative anthropology of self

The Latham Letter , 2005 **To Touch the Whale** Lynne Mitchell, 2008-12-30 Life along the bay is slow and hot and full of deep rooted memories For all those that live along this sandy shore they have to be weather tough and strong as the salt encrusted shells to survive the hard tide pull of their lives Katherine an unfulfilled artist goes to a cabin by the bay to rediscover her art and her life before it is too late For some the dark reflective waters can reveal too much but Katherine is determined to dive in and confront the faces of her past and cut loose the anchors that have left her feeling stranded in place Along the way she is helped by Annie and Amos two old survivors with stories of their own Together they will peer into the slow hot tides of this Southern coast and see things which for some can take nearly a lifetime to see at all **Encyclopedia of Marine Mammals** Bernd Würsig, J.G.M. Thewissen, Kit M. Kovacs, 2017-11-27 The Encyclopedia of Marine Mammals Third Edition covers the ecology behavior conservation evolution form and function of whales dolphins seals sea lions manatees

dugongs otters and polar bears This edition provides new content on anthropogenic concerns latest information on emerging threats such as ocean noise and impacts of climate change With authors and editors who are world experts this new edition is a critical resource for all who are interested in marine mammals especially upper level undergraduate and graduate students researchers and managers and is a top reference for those in related fields from oceanographers to environmental scientists Significant content and topic updates as well as the addition of new topics in such areas as anthropogenic disturbance Visual maps of the oceans and seas mentioned in contributions helping to place the geographical features described in the text with clear consistent species illustrations Written to help users learn new information or brush up on a topic quickly with the references at the end of each entry to help guide readers into more specialist literature [A Reenchanted World](#) James William Gibson, 2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in **Nimrod of the Sea** William Morris Davis, 1874 **Connection on the Ice** Patti H. Clayton, 1998 On Friday October 7 1988 Roy Ahmaogak of Barrow Alaska discovered three young gray whales trapped in ice off the Arctic coast The three week rescue operation that followed cost more than a million dollars and grew to include the White House the Soviet Union the environmental community Eskimo whalers Alaskan oil companies school children and journalists from around the world the Alaska National Guard and a host of other corporate governmental scientific and individual participants Some called it a non event a fiasco an absurd waste of money while others considered it the most extraordinary animal rescue effort ever undertaken In any case it is a story not likely to be forgotten Both complex and moving this story grounds Patti Clayton s overview of environmental ethics theory Using the story as a touchstone for critical comparison Clayton explores three major traditions of environmental philosophy extensionism ecofeminism s care ethic and Heideggerian Phenomenology In doing so she guides readers through the evolution and central concepts of each tradition moving intriguingly between theory and the well known rescue story as an apt illustration of the complexities of ethical deliberation Clayton s critical thinking leads to a deeper appreciation of the ways in which different sets of assumptions yield unique

interpretations of such issues Readers have the opportunity to consider the implications of this environmental ethics issue as a microcosm of human nonhuman interaction The unifying narrative of the whale story which is based on the commentary of participants and observers provides both an engaging vehicle for the study of environmental ethics and a real world testament to the multifaceted nature of human nonhuman relationships encouraging readers to reflect on the connection of such incidents in their own lives Author note Patti H Clayton is Visiting Lecturer in the Division of Multidisciplinary Studies at North Carolina State University
