Dog Sense John Bradshaw, 2011 Dogs have been mankind s faithful companions for tens of thousands of years yet today they are regularly treated as either pack following wolves or furry

humans The truth is dogs are neither and our misunderstanding has put them in serious crisis What dogs really need is a spokesperson someone who will assert their specific needs Renowned anthrozoologist Dr John Bradshaw has made a career of studying human animal interactions and in *Dog Sense* he uses the latest scientific research to show how humans can live in harmony with not just dominion over their four legged friends From explaining why positive reinforcement is a more effective and less damaging way to control dogs behavior than punishment to demonstrating the importance of weighing a dog s unique personality against stereotypes about its breed Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs

Bird Sense Tim Birkhead, 2012-04-24 What is it like to be a swift flying at over one hundred kilometres an hour Or a kiwi plodding flightlessly among the humid undergrowth in the pitch dark of a New Zealand night And what is going on inside the head of a nightingale as it sings and how does its brain improvise Bird Sense addresses questions like these and many more by describing the senses of birds that enable them to interpret their environment and to interact with each other Our affinity for birds is often said to be the result of shared senses vision and hearing but how exactly do their senses compare with our own And what about a bird's sense of taste or smell or touch or the ability to detect the earth's magnetic field Or the extraordinary ability of desert birds to detect rain hundreds of kilometres away how do they do it Bird Sense is based on a conviction that we have consistently underestimated what goes on in a bird's head Our understanding of bird behaviour is simultaneously informed and constrained by the way we watch and study them By drawing attention to the way these frameworks both facilitate and inhibit discovery Birkhead identifies ways we can escape from them to explore new horizons in bird behaviour There has never been a popular book about the senses of birds No one has previously looked at how birds interpret the world or the way the behaviour of birds is shaped by all their senses A lifetime spent studying birds has provided Tim Birkhead with a wealth of observation and a unique understanding of birds and their behaviour that is firmly grounded in science
